

FT Mechanism Assembly 40mm Installation and Maintenance Instructions

In line with our policy of continuous product improvement, we have found it beneficial to add a baffle plate over the inlet port. This eliminates any risk of flow from the inlet port affecting the correct operation of the float.

When fitting the mechanism please assemble the baffle plate supplied under the mechanism retaining bolts. The correct positioning is shown on sketch.

Baffle Arrangement used on 40 mm:-
 FT 10, FT 46
 FT 43, FT 44 and FT 47 (horizontal only)
