

AEL7 Series Electric Linear Actuator

Description

The AEL7 Series linear electric actuators are a cost effective heavy duty range of linear electric actuators only suitable for the modulation of Spirax Sarco Group valves. The AEL7 Series actuators must not be used for any other purpose. Actuators available with a spring extend failure function are referred to as AEL7T. Full nomenclature details can be found on page 27 of this document.

Simple to commission and especially suited to the steam generation and distribution areas of the steam ecosystem where robustness and reliability are key requirements, the AEL7 Series is compatible with the complete Spira-trol™ 2-port and 3-port ranges. It is also suitable for the Hiter Series 85 and Series 1000 ranges for more arduous applications.

Typical applications for the heavy duty AEL7 Series actuator include:

- Level control including boiler feed water
- Desuperheater TCV
- Thermal oil applications

The AEL7 Series actuator can be used as a problem solver* where:

- Vibration levels can be problematic – e.g. vent valves
- Steam systems where water hammer can be experienced

* The source of the problem should always be targeted in parallel with the use of the AEL7 to mitigate the risk of failure

The AEL7 electric linear actuators (with the exclusion of AEL7T) use two physical force dependent (torque) switches to determine the end position of the actuator stroke in both directions and stop the actuator motor i.e. uses the end stops within the valve in order to determine stroke. The force dependent switches do not require any adjustment to correspond to valves with different lengths of stroke thereby minimising the risk of damage due to incorrect set up or in-service wear and tear.

The AEL7T versions require the setting of end position with travel dependent switches due to the spring extend function.

Actuators will normally be supplied fitted to the control valve. When supplied separately, ensure the actuator selected is capable of providing the force necessary to close the two-port or three-port control valve against the expected differential pressure.

Available types

These electric linear actuators are available on 4 different supply variants: 230 Vac, 115 Vac, 24 Vac, and 24 Vdc. The standard version is suitable for VMD (Valve Motor Drive) input power signal. If required the actuator can be fitted with a positioner input card that can accept (4 - 20 mA or 2 - 10 Vdc) control signals.

This can either be used in conjunction with the positioner for 2 - 10 V or 4 - 20 mA input signals, or as feedback for VMD. Also available are auxiliary limit switches and anti - condense heater.

These actuators can be used with the following valves, in conjunction with an appropriate valve adaptor and mounting flange.

2 - Port	DN15 - DN300	Spira-trol™ L, K, and J series control valves
		Hiter series 85 and 1000
3 - Port	DN15 - DN200	Spira-trol™ Q series control valves

WARNING

Mains connection is required for the installation of the AEL7T Series actuator and therefore requires specialist knowledge of electrical circuits and systems, and the inherent dangers. A working knowledge of linear actuators is also required. Only suitably qualified personnel can operate the actuator under these conditions.

Standards and approvals:

This equipment is  marked and conforms to the following:

Electrical safety	2014/35/EU (Low Voltage Directive)
Operational safety	EN 60204-1:2018 (Machinery Directive)
	EN14597 (AEL7T only; Temperature control devices and temperature limiters for heat generating systems)
Operational requirements	EN15714-2 (Electric actuators for industrial valves - Basic requirements)
	Modulating actuator Class C acc. to DIN EN ISO 22153
Installation requirements	EN 61000-6-4:2007/A1:2011 (Electromagnetic compatibility)
	EN 60529:92 + A1:00 + A2:13 (Ingress Protection)
Material requirements	REACH and UK REACH

Certification options:

The DN15-100 Spira-trol™ 'L' and 'K' series valves are available with EN14597 certification for the complete assembly when used with the AEL7T spring extend actuator for high limit applications (Temperature control devices and temperature limiters for heat generating systems). Certification must be specified at time of order.

The EN14597 certification is only valid for DN15-100 standard trim type valves with seat options:

- **T** - 431 stainless steel
- **P** - Full PEEK

All other size, trim and seat option types are out of scope of this safety standard.

	Min.		0.0	0.0	0.0	

Note: Maximum differential pressure for saturated steam. Refer to Spirax Sarco for other liquids and gases.

Dimensions / Weights (approx.) in mm and kg.

AEL7
(AEL74 used for reference)

AEL7T

Actuator	Thrust	Dimensions (mm)					Weight (kg)
		A	B	C	D	E	
AEL71	1.2 kN	129	129	272	100	138	2.1
AEL71T	0.9 kN	162	162	490		213	8.7
AEL72	2.0 kN	173	173	374		189	8 kg (8.65 kg for Super-Capacitor versions)
AEL72T	2.1 kN	162	162	508		213	9.3
AEL73	4.0 kN	173	173	374		189	8 kg (8.65 kg for Super-Capacitor versions)
AEL74	6.0 kN	173	211	474		180	8.0
AEL75	8.0 kN	188	259	527		198	15 kg (15.65 kg for Super-Capacitor versions)
AEL76	12.0 kN						
AEL77	15.0 kN						
AEL78	20.0 kN	216	282	657	155	228	19 kg (19.65 kg for Super-Capacitor versions)

Safety information, installation and maintenance

Full details for the safe installation, commissioning and removal of the AEL7 Series actuator can be found in:
IM-P713-01 for AEL7 versions and **IM-P713-02 for AEL7T** versions

Installation and wiring note

The valve should be installed in the horizontal line. The position of the actuator will depend on the type of valve to which it is fitted and the temperature of the media. However, it is not recommended that the actuators be fitted directly below the valve or in a wet environment.

Disposal

This product is recyclable. No ecological hazard is anticipated with the disposal of this product, providing due care is taken.

Selection example

Control Valve	DN20 JE43 HTSUSS Kv10
Kvs	6.3
Connection	PN63
Operating ΔP	30 bar
Electrical Supply	24 Vdc
Control Input Signal	4-20mA
Position Feedback	4-20mA
End-position Feedback	VFC

Information Source		
Maximum ΔP	103.4 bar	Differential Pressure Tables (Class IV) Metal Seated (T & S)
Mounting Flange	EL5971J	AEL7 Valve Adapter and Mounting Flange Selection - Spira-trol™ J
Stem Adapter	AEL7XJ01	
Positioner	AEL7X224 (Supplied with actuator)	Nomenclature and How to Order
Position Feedback	Positioner function	AEL7 Technical Specification
End-position Feedback	AEL7X014	AEL7 Assessories (Positioner)

Nomenclature and How to order

Product	A	Actuator		A
Type	E	Electric		E
Action	L	Linear		L
Series	7	-		7
Thrust	1	1.2 kN	0.9 kN for AEL71T	3
	2	2.0 kN	2.1 kN for AEL72T	
	3	4.0 kN		
	4	6.0 kN		
	5	8.0 kN		
	6	12.0 kN		
	7	15.0 kN		
	8	20.0 kN		
Nominal Stroke	1	20 mm	Stroke Setting from factory. For full stroke information and adjustment, refer to IM-P713-01.	2
	2	30 mm		
	3	50 mm		
	4	70 mm		
Speed	1	Low	≤0.7 mm/s	2
	2	Medium	0.8-1.5 mm/s	
	3	High	1.6+ mm/s	
Supply Voltage	1	230 Vac		4
	2	115 Vac		
	3	24 Vac		
	4	24 Vdc		
Control Signal	F	VMD	24 Vac	P
	G	VMD	110 Vac	
	J	VMD	230 Vac	
	K	VMD	24 Vdc	
	P	Modulating	(0)4-20 mA / 0(2)-10V Positioner	
Failure Mode	X	None		X
	S	Super-Capacitor	Non-retrofit option. Not suitable for 24 Vac	
	T	Spring	Non-retrofit option. Not suitable for 24 Vdc	
Potentiometer	X	None		A
	A	Potentiometer	1 x 1000Ω ¹	

¹ Required for any actuator with positioner card

How to order example

1-off AEL73242PXA plus Auxiliary travel switch (AEL7X014)

1-off AEL7XJ08 DN15-50 J Series adapter
