APT14, APT14HC and APT14SHC
Automatic Pump Traps

Description

The Spirax Sarco APT14, APT14HC and APT14SHC automatic pump traps are flanged or screwed displacement receivers pressure rated to PN16. The units are capable of automatically trapping or pumping, depending on pipeline conditions. The unit is operated by steam and is used to remove condensate from process plant under all operating conditions including vacuum. For optional extras see 'How to order' on page 6.

Design compliance

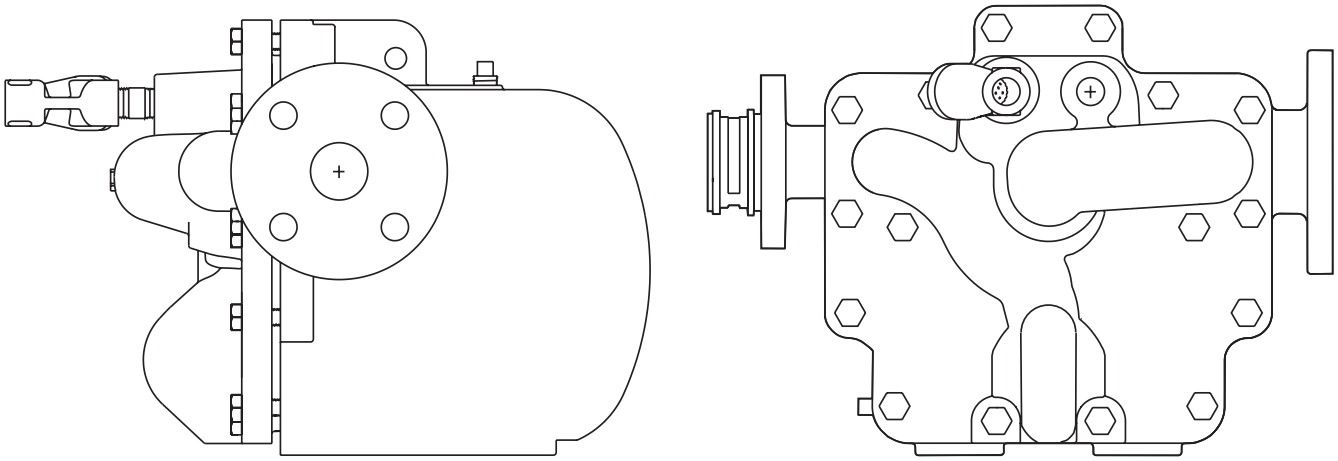
The shell of the product has been designed in accordance with A.D. Merkblatter/ASME VIII.

Standards

These products fully comply with the requirements of the European Pressure Equipment Directive 2014/68/EU, ATEX Directive and carry the CE and Ex marks when so required.

Certification

These products are available with certification to EN 10204 3.1.
Note: All certification/inspection requirements must be stated at the time of order placement.



Sizes and pipe connections

Model and body material	Inlet and outlet sizes and pipe connections		Connections					
			Motive / exhaust		Sight glass		Drain	
APT14 SG iron	Flanged DN40 inlet x DN25 outlet	EN 1092 PN16	BSP T Rp (ISO 7-1) or NPT	DN15 (½")	BSP T Rp (ISO 7-1)	DN15 (½")	BSP T Rp (ISO 7-1)	DN10 (⅜")
		ASME B 16.5 150	NPT		NPT		NPT	
		JIS 10 (JIS B 2210)	BSP T Rp (ISO 7-1)		BSP T Rp (ISO 7-1)		BSP T Rp (ISO 7-1)	
		KS 10 (KS B 1511)	BSP T Rp (ISO 7-1)		BSP T Rp (ISO 7-1)		BSP T Rp (ISO 7-1)

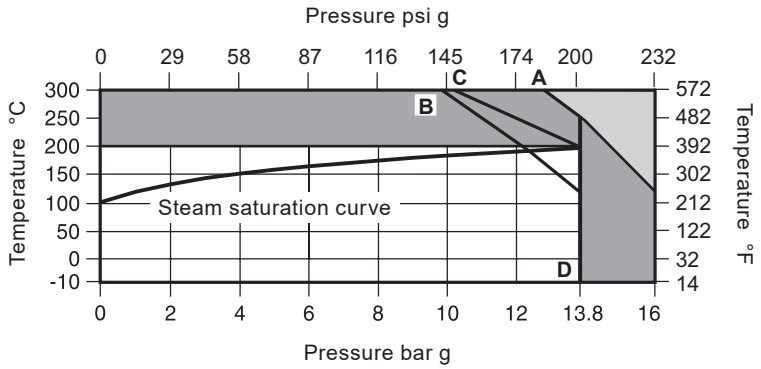
Pressure/temperature limits - APT14 and APT14HC (SG iron)



The product **must not** be used in this region.

The product should not be used in this region or beyond its operating range as damage to the internals may occur.

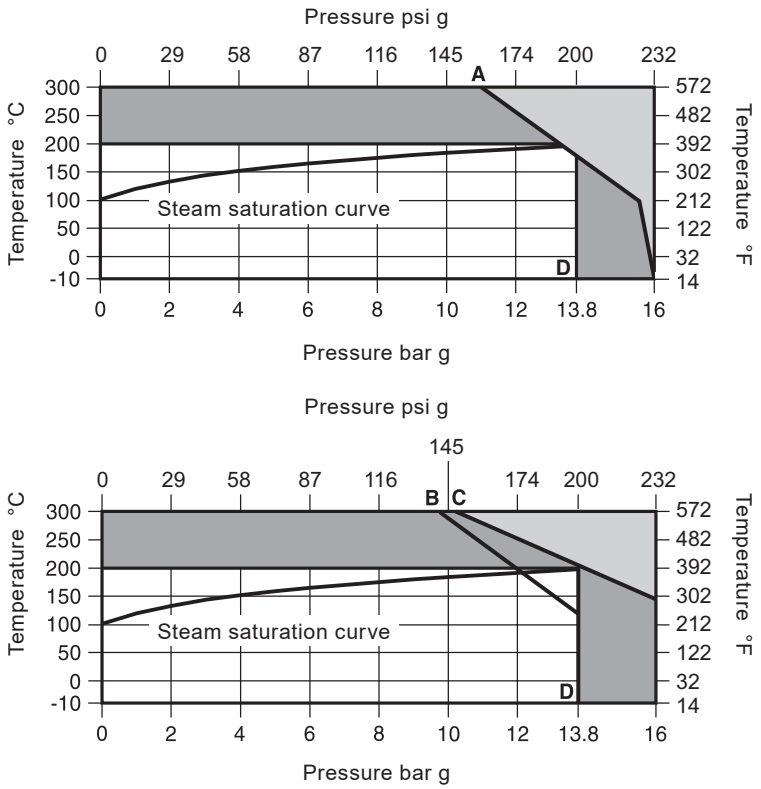
A - D Flanged PN16.

B - D Flanged JIS/KS 10.

C - D Flanged ASME 150.

Body design conditions			PN16
Maximum motive inlet pressure		13.8 bar g	200 psi g
PMA	Maximum allowable pressure	16 bar g @ 120 °C	232 psi g @ 248 °F
TMA	Maximum allowable temperature	300 °C @ 12.8 bar g	572 °F @ 186 psi g
Minimum allowable temperature **Note:** For lower temperatures consult Spirax Sarco.		-10 °C	14 °F
PMO	Maximum operating pressure for saturated steam service	13.8 bar g @ 198 °C	200 psi g @ 388 °F
Maximum backpressure for standard pumps (for higher backpressures contact Spirax Sarco)		5 bar g	73 psi g
TMO	Maximum operating temperature for saturated steam service	198 °C @ 13.8 bar g	388 °F @ 200 psi g
Temperature limits (Ambient ⟨Ex⟩)		-10 °C to 200 °C	14 °F to 392 °F
Product is safe for use under full vacuum conditions			
Designed for a maximum cold hydraulic test pressure of:		24 bar g	348 psi g
Filling/ Installation	Recommended filling head above the pump (from the base of the receiver / process)	0.3 m	1 ft
	Maximum recommended installation (from the base of the pump) for higher installation heads refer to Spirax Sarco	1 m	3.2 ft
	Minimum installation head required (from the base of the pump)	0.2 m	0.7 ft

Pressure/temperature limits - APT14SHC (carbon steel)



The product **must not** be used in this region.

The product should not be used in this region or beyond its operating range as damage to the internals may occur.

A - D Flanged PN16.

B - D Flanged JIS/KS 10.

C - D Flanged ASME 150.

Nominal capacities

For full capacity details for a specific application consult Spirax Sarco. To accurately size the pump trap, the following data is required.

1. Installation head available, from the base of the pump trap to the centre line of the heat exchanger/process condensate outlet (m). If the outlet is mounted vertically, then this should be from the base of the pump to the face of the outlet.
2. Motive steam pressure available to power the pump trap (bar g).
3. Total backpressure in the condensate return system (bar g).
4. Heat exchanger full-load operating pressure (bar g).
5. Heat exchanger maximum steam load (kg / h).
6. Minimum temperature of secondary fluid (°C).
7. Maximum controlled temperature of secondary fluid (°C).

Model	APT14	APT14HC and APT14SHC
Pump discharge/cycle	5 litres (1.3 gallons)	8 litres (2.1 gallons)

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-P612-04) supplied with the product.

How to specify

APT14 and APT14HC

The pump trap shall be a Spirax Sarco automatic pump trap type APT14 operated by steam to 13.8 bar g (200 psi g). No electrical energy shall be required. Body construction from SG iron (EN JS 1025 dual certified with ASTM A395) with a swing type inlet check valve (APT14 and APT14HC) and ball type outlet check valve (APT14 only). The internal trap mechanism shall contain dual stainless steel floats connected with a two stage trap, while the internal pump mechanism shall be a stainless steel single tension spring snap-action device with no external seals or glands.

APT14SHC

The pump trap shall be a Spirax Sarco automatic pump trap type APT14SHC operated by steam to 13.8 bar g. No electrical energy shall be required. Body construction from carbon steel (EN 1.0619 dual certified with ASTM A216 WCB) with a swing type inlet check valve. The internal trap mechanism shall contain dual stainless steel floats connected with a two stage trap, while the internal pump mechanism shall be a stainless steel single tension spring snap-action device with no external seals or glands.

How to order

Example: 1 off Spirax Sarco automatic pump trap, type APT14, DN40 x DN25, flanged EN 1092 PN16 with BSP T Rp (ISO 7-1) motive fluid connections.

Optional extras

Both the APT14 and APT14HC are available with the **body and cover coated with electroless nickel plate (ENP)**. This option, when required, will be denoted as **APT14 ENP** and **APT14HC ENP** respectively and must be stated at the time of order placement.

The APT14, APT14HC and APT14SHC are available with the body drilled, tapped and plugged to accept sight level gauges. **Note:** Sight level gauges can not be fitted retrospectively to the standard APT14, APT14HC or APT14SHC.

Spare parts

The spare parts available are shown in solid outline. Parts drawn in a grey line are not supplied as spares.

Available spares

A	Cover assembly (**A - G** inclusive)	**1, 2, 5-25**
B	Cover gasket	**2**
C	Inlet check valve	**2, 12**
D	Spring and actuator arm	**2, 14, 24**
E	Floats	**2, 5, 6, 7**
F	Trap and outlet check valve mechanism	**2, 8, 9, 10** (APT14 only)**, 21, 22, 23**
G	Inlet/exhaust valve and seat kit	**2, 16, 17, 18, 19, 27**
H	See separate literature: For the **APT14** or **APT14HC** see TI-P163-01 and for the **APT14SHC** see TI-P063-02	**28**
DCV10 outlet check valve (APT14HC and APT14SHC only). See separate literature TI-P601-32		**29**

Please note:
For customer convenience, spares are supplied in kits to ensure all the appropriate replacement parts are available e.g. when an inlet/exhaust valve and seat assembly is ordered, all replacement split pins, washers and gaskets will be provided in addition to the key components listed.

How to order spares
Always order spares by using the description given in the column headed 'Available spares' and state the size and type of unit.

Example: 1 off Inlet/exhaust valve and seat kit for a Spirax Sarco DN40 x DN25 APT14 automatic pump trap.
