Blowdown Control Valves DN15 to DN50 (½" to 2")

Description

Spirax Sarco's BCV blowdown control valves are manufactured using the market proven Spira-trol™ body. These valves have been specifically designed for the blowdown of steam boilers or for other high pressure drop, low flow applications, and are generally used with a blowdown controller as part of an automatic BCV control system.

The flowrate is adjusted by setting the stroke of the valve spindle.

These valves have been specially designed to minimize seat erosion and ensure consistent tight shut-off.

A ¼" BSP plug at the base of the valve may be removed to allow a sample cooler to be fitted.

Two versions are available:

- Electrohydraulically actuated BCV blowdown control valve.
- Pneumatically actuated BCV blowdown control valve.

Available models:

Material	Connections			
	Screwed	Socket weld	Flanged	Butt weld
Carbon steel	BCV41	BCV42	BCV43	BCV44
Stainless steel	BCV61	BCV62	BCV63	BCV64
SG iron	BCV71		BCV73	
Alloy steel		BCV82	BCV83	BCV84

Spira-trol™ valve body options:

Stem sealing	Graphite packing	High temperature applications
Seating	Hard facing	316L stainless steel with Stellite 6 facing

BCV blowdown control valves are compatible with the following actuators and positioners:

Version	Actuator	Positioners
Electric	AEL3 series	
Pneumatic	PN9_ _ _ _ series	PP5 (pneumatic)
		EP5 (electropneumatic)
		ISP5 (intrinsically safe electropneumatic)
		SP200is, SP400 and SP500 (microprocessor based electropneumatic)
		SP300 (digital communications)

Operation

BCV blowdown control valves are supplied loaded to the closed position.

Electrical version: When the power is connected to the actuator the valve opens to the position set by the internal limit switch.

Pneumatic version: When the solenoid valve opens, air is admitted to the actuator activating the valve to open to the selected stroke.

Standards

These products fully comply with the requirements of the European Pressure Equipment Directive (PED).

Certification

These products are available with material certification to EN 10204 3.1.

Note: All certification / inspection requirements must be stated at the time of order placement.

Size and pipe connections

½", ¾", 1", 1¼", 1½" and 2" Screwed BSP or NPT, Socket weld and Butt weld.

DN15, DN20, DN25, DN32, DN40 and DN50 Flanged:

EN 1092 PN25, PN40, PN63 and PN100

ASME class 125, 150, 250, 300 and 600

JIS/KS 10K, 20K, 30K and 40K

Materials

No.	Part	Material
1	Body	Carbon steel 1.0619+N / WCB
		Stainless steel 1.4408 / CF8M
		SG iron EN-GJS-400-18-LT / A395
		Alloy steel 1.7357 / WC6
2	Bonnet	Forged steel 1.0460 / A105N or 1.0619 / WCB
		Stainless steel 1.4408 / CF8M
		SG iron EN-GJS-400-18-LT / A395
		Alloy steel 1.7357 / WC6
3	Seat retainer	Stainless steel 316L
4	Seat	Stainless steel 316L with Stellite
5	Plug	Stainless steel 316L with Stellite

Electrical data

Actuator	AEL3 series
Supply voltage	Standard 24 Vac, Optional card 230 Vac and 110 Vac
Supply frequency	50 to 60 Hz
Power consumption	10 to 18
Actuator speed	2 mm/s, 4 mm/s or 6 mm/s
Actuators thrust maximum	2 kN

Size	Actuator	Maximum shut-off value
DN15 to DN25	1/2" to 1"	AEL3 series / PN9123E
DN32 to DN50	1/4" to 2"	AEL3 series / PN9223E

Warnings:

If the temperature of the medium in the valve is high, the drive columns and the shaft may also reach high temperatures.

High Temperature Extension:

The extension kit is to be used on applications above 130 °C to up to 240 °C. There are two kit options of up to 180 °C and another for up to 240 °C

1. Unscrew the actuator mounting plate screws for pillars.
2. Screw the extension pillars into actuator pillars and tighten to 12 Nm.
3. Screw the actuator mounting plate screws into pillars and tighten to 25 Nm.
4. Mount the coupling extension into the actuator coupling until it snaps closed.

Flow coefficient	To be specified	Kvs 0.5
Connection type	To be specified	Flanged ASME 300
Actuation	PN = Pneumatic EL = Electrical 230 Vac, 110 Vac or 24 Vac	PN

Selection example

DN15	-	BCV	4	3	H	W	S	U	S	S	-	Kvs 0.5	-	Flanged ASME 300	PN
------	---	-----	---	---	---	---	---	---	---	---	---	---------	---	---------------------	----

How to order

Example: 1 off Spirax Sarco DN15 BCV43 pneumatically actuated control valve having flanged ASME 300 connections.

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-P403-103) supplied with the product.

Installation note: The blowdown control valve should preferably be installed with the actuator vertically above the pipework and the flow direction as indicated on the valve body. It can be fitted in other positions, but not upside down.

Disposal: This product is recyclable. No ecological hazard is anticipated with the disposal of the product, providing due care is taken.

Spare parts

The spare parts available are detailed below. No other parts are supplied as spares.

Please note that the spare parts available for the BCV blowdown control valve are the same for both the electrically and pneumatically actuated versions.

Available spares

Actuator clamping nut (Only for high pressure version)		A
Gasket set		B, G
Stem seal kits	Graphite packing	C1
Plug stem and seat kit	Linear trim (No gaskets supplied)	D2, E

How to order spares

Always order spares by using the description given in the column headed 'Available spares', and state the size and type of valve and specify clearly the full product description as found on the label of the blowdown control valve body, as this will ensure that the correct spare parts are supplied.

Example: 1 off Actuator clamping nut for a Spirax Sarco DN15 BCV43 blowdown control valve.
