

# BPS32 and BPS32Y Stainless Steel Balanced Pressure Thermostatic Steam Traps

## Description

The BPS32 and BPS32Y are stainless steel maintainable balanced pressure thermostatic steam traps with straight connections. The BPS32 has an integral flat strainer screen and the BPS32Y an integral cylindrical Y-type strainer. All pressure bearing components are produced by TÜV approved suppliers in accordance with AD-Merkblatt WO/TRD100. Both traps are unaffected by waterhammer and are available as follows:-

<b>Standard units</b>	BPS32 and BPS32Y	having 'STD' fill capsule
<b>Also available</b>	BPS32CV and BPS32YCV	having 'STD' fill capsule and check valve.

**Note:** When placing an order always state capsule fill.

## Capsule fill and operation:

**Standard capsule** - Is marked with 'STD' for operation at approximately 12 °C below steam saturation temperature.

**Optionally** - The capsule can be supplied for sub-cooled 'SUB' operation at approximately 24 °C below steam saturation temperature or near-to-steam 'NTS' operation at approximately 6 °C below steam temperature.

## Capacities

## Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-P005-04) supplied with the product.

### Installation note:

The BPS32 and BPS32Y are designed for installation in any position, horizontal or vertical.

It is recommended that a non-return valve is fitted when discharging condensate into return lines where backpressure is experienced.

It is also recommended that a diffuser is fitted when discharging to atmosphere.

For ease and maintenance, consideration should be given to fitting isolation valves upstream and downstream of the steam trap.

### Disposal

These products are recyclable. No ecological hazard is anticipated with the disposal of these products, providing due care is taken.
