

BSAT and BSA Bellows Sealed Stop Valves

BSA6T shown

Description

A range of sealed, in-line stop valves having twin ply bellows as standard throughout the range. These valves have been designed for use on steam, gas, liquid, condensate and water systems.

The standard BSAT range comes complete with throttling plug and locking device.

The alternative BSA range has a flat disc.

The Tables on page 2 clearly display the available sizes, pipeline connections and available options for the standard and alternative ranges.

Standards

The product fully complies with the requirements of the Pressure Equipment Directive (PED) and carries the  mark when so required.

Certification

The BSA1 and BSA1T is available with a manufacturer's Typical Test Report.

The BSA2, BSA2T, BSA3, BSA3T, BSA6T and BSA64T is available with certification to EN 10204 3.1.

Note: All certification/inspection requirements must be stated at the time of order placement.

Range and options

Standard BSAT range - complete with throttling plug and locking device

10.7													827

To convert K_v to volume flowrate in m³/h:

$$\dot{Q} = K_v \times \sqrt{\Delta P}$$

Where:

\dot{Q} = Volume flow in cubic m/h

ΔP = Pressure drop in bar

Note: The maximum recommended differential pressure in throttling function:

DN15 - DN80	2.0 bar
DN100 - DN125	1.5 bar
DN150	1.0 bar
DN200 - DN250	0.8 bar

If the BSAT is used above these quoted figures, increased noise and vibration may be experienced.

The following graphs show handwheel rotation and flow characteristic with water at 20 °C:

Product limitations

BSA1T and BSA1

A - A Flanged JIS/KS 10K
B - B Flanged PN16

Body design conditions		PN16	JIS/KS 10K
PMA	Maximum allowable pressure	16 bar g	14 bar g
TMA	Maximum allowable temperature	300 °C	220 °C
PMO	Maximum operating pressure for saturated steam service	12.9 bar g	11 bar g
TMO	Maximum operating temperature	Soft seat	230 °C
		Metal seat	220 °C
Minimum operating temperature		-10 °C	-10 °C
Designed for a maximum cold hydraulic test pressure of:		24 bar g	20 bar g

BSA2T and BSA2

Body design conditions		PN16	PN25
PMA	Maximum allowable pressure	16 bar g	25 bar g
TMA	Maximum allowable temperature	350 °C	350 °C
PMO	Maximum operating pressure for saturated steam service	14.7 bar g	22.3 bar g
TMO	Maximum operating temperature	Soft seat	230 °C
		Metal seat	350 °C
Minimum operating temperature		-10 °C	-10 °C
Designed for a maximum cold hydraulic test pressure of:		24 bar g	38 bar g

Key

 The product **must not** be used in this region.

Note: Δ PMX Maximum differential pressure is limited to the PMO.

Maximum permissible differential pressure in throttling function:

DN15 - DN80	2.0 bar
DN100 - DN125	1.5 bar
DN150	1.0 bar
DN200 - DN250	0.8 bar

BSA3T and BSA3 (DIN)

PN25, DN200

PN40, DN15 - DN150

Body design conditions		PN25, DN200	PN40, DN15 - DN150
PMA	Maximum allowable pressure	25 bar g	40 bar g
TMA	Maximum allowable temperature	400 °C	400 °C
PMO	Maximum operating pressure for saturated steam service	23.2 bar g	* 30.4 bar g
TMO	Maximum operating temperature	Soft seat	230 °C
		Metal seat	400 °C
Minimum operating temperature		-10 °C	-10 °C
Designed for a maximum cold hydraulic test pressure of:		38 bar g	60 bar g

* Maximum operating pressure is limited to 27 bar g for the soft seat version only

BSA3T and BSA3 (ASME)

C - D Flanged ASME 150
C - E Flanged JIS/KS 20K
C - F Flanged ASME 300

Body design conditions		ASME 150	ASME 300	JIS/KS 20K
PMA	Maximum allowable pressure	19.6 bar g	51 bar g	34 bar g
TMA	Maximum allowable temperature	425 °C	425 °C	425 °C
PMO	Maximum operating pressure for saturated steam service	14 bar g	*41.6 bar g	*30.7 bar g
TMO	Maximum operating temperature	Soft seat	230 °C	230 °C
		Metal seat	425 °C	425 °C
Minimum operating temperature		-29 °C	-29 °C	0 °C
Designed for a maximum cold hydraulic test pressure of:		31 bar g	77 bar g	50 bar g

* Maximum operating pressure is limited to 27 bar g for the soft seat version only

Key

The product **must not** be used in this region.

Note: ΔPMX Maximum differential pressure is limited to the PMO.

Maximum permissible differential pressure in throttling function:

DN15 - DN80	2.0 bar
DN100 - DN125	1.5 bar
DN150	1.0 bar
DN200 - DN250	0.8 bar

Product limitations

BSA6T and BSA64

Body design conditions		PN40	
PMA	Maximum allowable pressure	40 bar g @ 50 °C	
TMA	Maximum allowable temperature	400 °C @ 25 bar g	
Minimum allowable temperature		-10 °C	
PMO	Maximum operating pressure for saturated steam service	Metal seat 29.8 bar g @ 236 °C	
		Soft seat 27.0 bar g @ 230 °C	
TMO	Maximum operating temperature	Metal seat 400 °C @ 25.6 bar g	
		Soft seat 230 °C @ 27.0 bar g	
Minimum operating temperature		-10 °C	
ΔPMX	Maximum differential pressure	On/off function Limited to the PMO	
		Throttling function	DN15 - DN80 2 bar
			DN100 1.5 bar
Designed for a maximum cold hydraulic test pressure of:		60 bar g	

Key	<p>The product must not be used in this region.</p> <p>Note: ΔPMX Maximum differential pressure is limited to the PMO.</p>	Maximum permissible differential pressure in throttling function:	
		DN15 - DN80	2.0 bar
		DN100 - DN125	1.5 bar
		DN150	1.0 bar
		DN200 - DN250	0.8 bar

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-P137-02) supplied with the product.

Installation note

Install in the direction of flow given by the arrow on the body with the handwheel in a suitable position.

Disposal

These products are recyclable. No ecological hazard is anticipated with the disposal of these products, providing due care is taken.

How to order

Example: 1 off DN25 Spirax Sarco type BSA2T bellows sealed stop valve, flanged PN16 or PN25.

Note: Should the differential pressure exceed those listed against the respective sizes in the table below, then please ensure balancing discs are specified for use in the valves (see illustration overleaf).

Size	DN125	DN150	DN200	DN250
Differential pressure (bar)	25	17	10	6

Spare parts

The spare parts are shown in heavy outline. Parts drawn in a grey line are not supplied as spares.

Available spares

Body/bonnet gasket and stem packing	10, 8 (2 off)
Stem and bellows assembly (state if BSAT or BSA)	5, 6, 8, 10
Disc (and optional disc where fitted) - state full description of the valve	4, 8, 10

How to order spares

Please note: for customer convenience spares are supplied in kits to ensure all the appropriate replacement parts are supplied to carry out a specific maintenance task. e.g. when a stem/bellows assembly is ordered, parts (10), (8) and (6, 5) will be included in the kit.

Always order spares by using the description given in 'Available spares' and state the size and type of stop valve.

Example: 1 - Body/bonnet gasket and stem packing for a DN15 Spirax Sarco BSA2T PN16 bellows sealed stop valve.
