### FT46-C

4.5-21 bar (65 psi - 305 psi)

## Description

The FT46 is an austenitic stainless steel bodied ball float steam trap having stainless steel working internals and automatic air venting facility. The body and cover castings are produced by a TÜV approved foundry. The trap is supplied with integrally flanged connections and can be maintained without disturbing the pipework. Flow direction for the horizontal trap is clearly illustrated above.

## Air vent

The BP99/32 capsule which is used in the FT46 is suitable for use on 150 °C (302 °F) superheat @ 0 bar g. This value reduces with elevated pressure.

The bimetallic element is fitted as standard to the 32 bar (464 psi) variants to provide additional superheat resistance. It is also available on other variants on request. Please refer to the Pressure/temperature limits graph on page 2.

## Standards

This product fully complies with the requirements of the European Pressure Equipment Directive 2014/68/EU and carries the  mark when so required.

## Certification

This product is available with certification to EN 10204 3.1.

**Note:** All certification/inspection requirements must be stated at the time of order placement.

## Optional extras

A **manually adjustable needle valve** (designated 'C' on the nomenclature i.e. **FT46-C**) can be fitted to the trap. This option provides a **steam lock release (SLR)** feature in addition to the standard air vent.

**Note:** The SLR and bimetallic air vent cannot be used in conjunction with each other. Alternative arrangements may be available. For further information please consult Spirax Sarco.

The **top of the cover can be drilled and tapped 3/8" BSP or NPT** for the purpose of fitting a balance line if requested at the point of order.

The **bottom of the cover can be drilled and tapped 3/8" BSP or NPT** for the purpose of fitting a drain cock if requested at the point of order.

## Sizes and pipe connections

DN15, DN20, DN25, DN40 and DN50 (1/2", 3/4", 1", 1 1/2" and 2").

**Note:** Flow direction when facing the body: - DN15 to DN25 (1/2" to 1") is left to right. - DN40 and DN50 (1 1/2" and 2") is right to left.

**Standard flanges** are EN 1092 PN40 with face-to-face dimensions in accordance with EN 26554 (Series 1).

**On request** - ASME (ANSI) B 16.5 Class 150 and 300 flanges are available with face-to-face dimensions in accordance with EN 26554 (Series 1).

**Note:** ASME (ANSI) flanges are supplied with tapped (UNC) holes for flange bolts.

## Pressure/temperature limits

 The product **must not** be used in this region.

 This product should not be used in this region as damage to the air vent may occur.

**A - B** Flanged EN 1092 PN40 and ASME (ANSI) 300.

**A - C** Flanged ASME (ANSI) 150.

**Note:** The use of the bimetallic element extends the superheat resistance to in excess of 400 °C (752 °F).

# Capacities

## Additional cold water capacities from the thermostatic air vent under start-up conditions

Capacities shown above are based on condensate at saturation temperature. Under start-up conditions when the condensate is cold the internal thermostatic air vent will be open and provides additional capacity to the main valve.

The following table gives the minimum additional cold water capacities from the air vent.

$\Delta P$ (bar)		0.5 (7)	1 (15)	2 (29)	3 (44)	4.5 (65)	7 (102)	10 (145)	14 (203)	21 (305)	32 (464)

## Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-S02-30) supplied with the product.

### Installation note:

The FT46 must be installed with the direction of flow as indicated on the body, and with the float arm in a horizontal plane so that it rises and falls vertically.

### Disposal

This product is recyclable. No ecological hazard is anticipated with the disposal of this product providing due care is taken.

### How to order

**Note:** Although FT46 4.5 bar - 21 bar (65 psi - 305 psi) versions are fitted with a capsule air vent assembly as standard, they can be fitted with a bimetallic air vent assembly upon request.

**Example:** 1 off Spirax Sarco DN25 FT46-21 ball float steam trap, having an austenitic stainless steel body and cover with a bimetallic air vent assembly. Connections are to be flanged to EN1092 PN40.

**Note:** Although the FT46 32 bar (464 psi) is fitted with a bimetallic air vent assembly as standard, it can be fitted with a capsule air vent assembly and steam lock release feature upon request.

**Example:** 1 off Spirax Sarco DN25 FT46-21 ball float steam trap, having an austenitic stainless steel body and cover with a capsule air vent assembly. Connections are to be flanged to EN1092 PN40.

## Spare parts

The spare parts available are shown in solid outline. Parts drawn in a grey line are not supplied as spares.

**Note:** Item 12 (Erosion deflector) is only used in DN40 and DN50 (1½" and 2").

### How to order spares

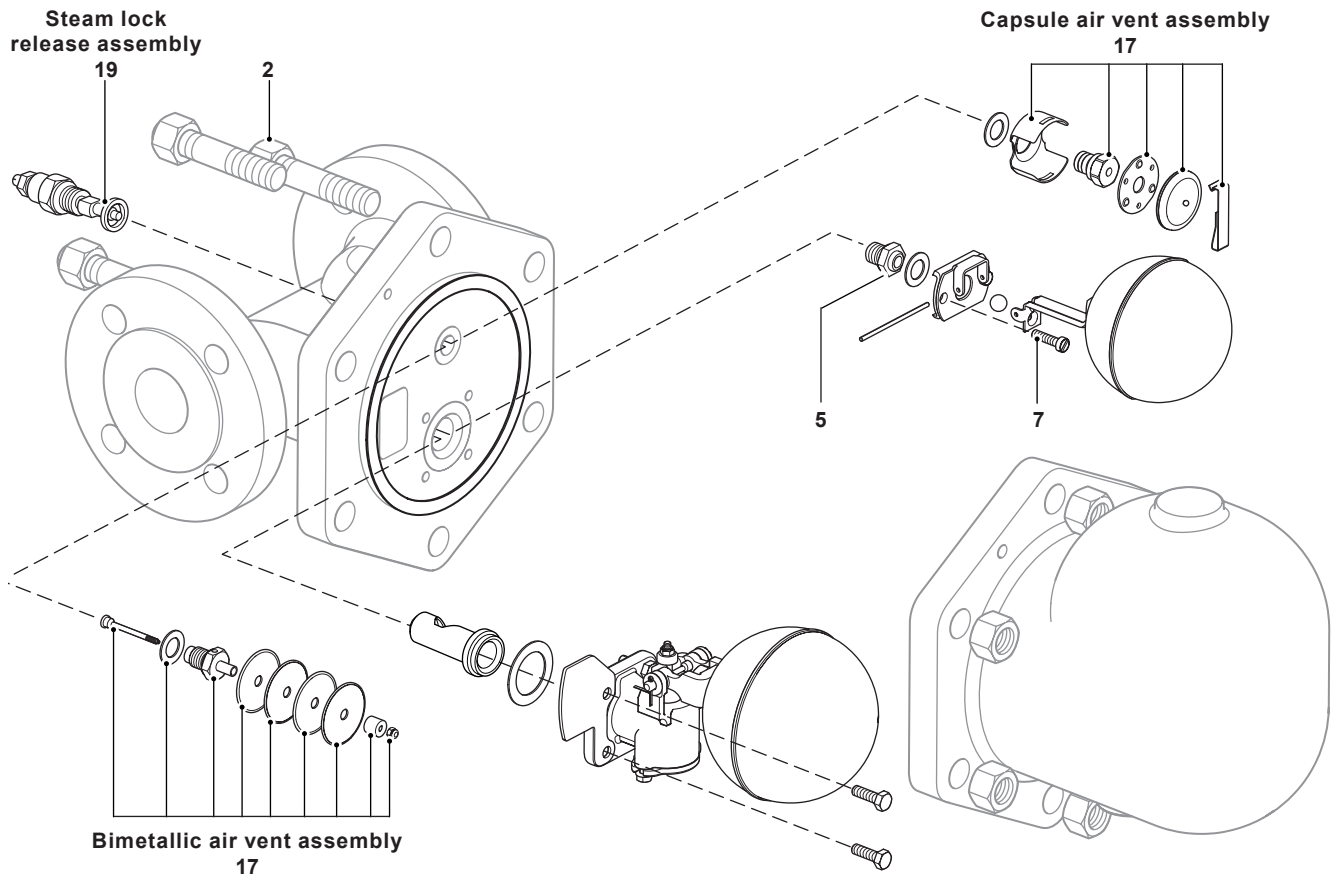

Always order spares by using the description given in the column headed 'Available spares' and state the size and type of trap, including pressure range.

**Example:** 1 - Capsule air vent assembly for a Spirax Sarco DN20 FT46-4.5 ball float steam trap.
