Ball Float Steam Traps (DN15 to DN50)

Description

The FT47 is an SG iron ball float steam trap with integral automatic air venting facility. It is available with horizontal flanged connections as well as vertical flanged connections, designated FT47V. As an option in the horizontal version up to 21 bar g, a manually adjustable needle valve can be added for use as a steam lock release designated FT47-C. If required, the cover can be drilled and tapped $\frac{3}{8}$ " BSP or NPT for the purpose of fitting a drain cock. Body and cover castings are produced by a TÜV approved foundry.

Standards

This product fully complies with the requirements of the European Pressure Equipment Directive 97/23/EC and carries the  mark when so required.

Certification

This product is available with a manufacturers' Typical Test Report. As an available option certification to EN 10204 3.1 can be supplied. **Note:** All certification/inspection requirements must be specified at the time of order placement.

Sizes and pipe connections

DN15, DN20, DN25, DN40 and DN50.

Note: Flow direction, for horizontal orientated traps, when facing the body: - DN15 to DN25 is left to right. - DN40 and DN50 is right to left. For vertically orientated traps the flow is downwards only.

Standard flanges are EN 1092 PN40 and PN25 with face-to-face dimensions in accordance with EN 26554 (Series 1).

On request ASME B 16.5 Class 150 flanges are also available with face-to-face dimensions in accordance with EN 26554 (Series 1). ASME flanges are supplied with tapped (UNC) holes for flanged bolts.

Capacities

Additional cold water capacities from the thermostatic air vent under start-up conditions

Capacities shown above are based on condensate at saturation temperature. Under start-up conditions when the condensate is cold the internal thermostatic air vent will be open and provides additional capacity to the main valve. The following table gives the minimum additional cold water capacities from the air vent.

ΔP (bar)		0.5	1	2	3	4.5	7	10	14	21	32
		Minimum additional cold water capacity (kg/h)									
DN15 and DN20	up to 21 bar	450	600	780	1 040	1 140	1 350	1 530	1 750	2 300	-

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-S02-30) supplied with the product.

Installation note:

The FT47 must be installed with the direction of flow as indicated on the body, and with the float arm in a horizontal plane so that it rises and falls vertically.

Disposal

This product is recyclable. No ecological hazard is anticipated with the disposal of this product, providing due care is taken.

How to order
