FTS23 Stainless Steel Body and Cover FTC23 Carbon Steel Body with Stainless Steel Cover Ball Float Steam Traps

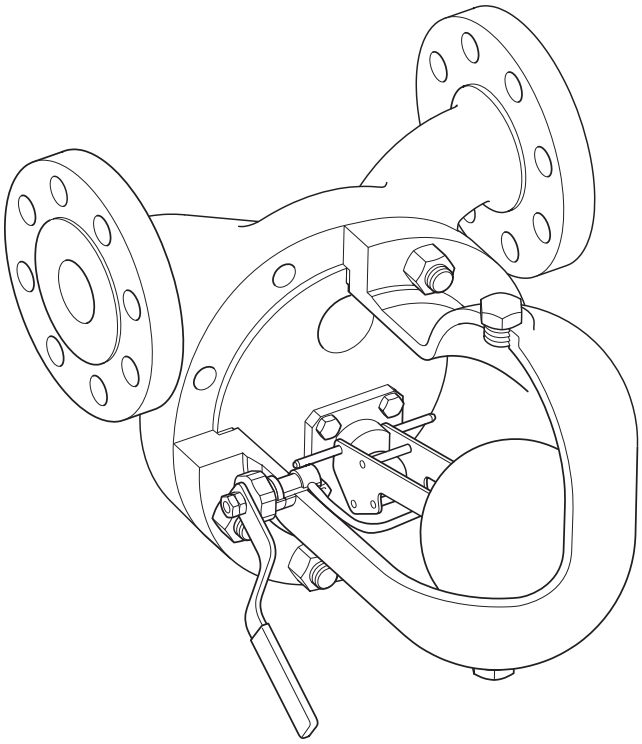
Description

FT_23 ball float steam traps are suitable for use with saturated and superheated steam, on process equipment, and the first choice for drainage of temperature controlled systems.

They are the perfect choice in solving problems caused by steam that is carrying solid and incondensable contaminants such as salts and gasses; These quickly lead to fouling and the accumulation of sediment and debris, resulting in failure of the internal mechanism. They are typically used on geothermal steam.

The main design feature is the innovative self-cleaning float closing mechanism, which allows automatic safe operation even in cases of severe steam contamination. Furthermore, the position and size of the main valve and seat makes it easier for the discharge of condensate and solid contaminant. The trap is able to modulate the condensate flow adapting immediately to sudden and large variations of flow and pressure.

Another key feature of the unit is the external manual lever that allows the valve ball to be fully opened regardless of the presence or absence of condensate in the unit - This facilitates the fast removal of any sediment / condensate that may be in the unit and easier inspection in maintaining optimum performance of the internal mechanism.



Available types

FTS23-07	Stainless steel body, cover and internals	PMO	7 bar g (102 psi g)
FTS23-23		PMO	23 bar g (334 psi g)
FTC23-07	Carbon steel body with Stainless steel cover and internals	PMO	7 bar g (102 psi g)
FTC23-23		PMO	23 bar g (334 psi g)

Standards

These products fully comply with the requirements of the European Pressure Equipment Directive 2014/68/EU and carry the CE mark when so required.

Approvals

These products are available with a manufacture's Typical Test Report or Certification to EN 10204 3.1.
Note: All certification / inspection requirements must be stated at the time of order placement.

Sizes and pipe connections

DN25, DN40 and DN50	Flanged EN 1092 PN40
1½" and 2"	Flanged ASME B16.5 Class 150
	Flanged ASME B16.5 Class 300

Materials

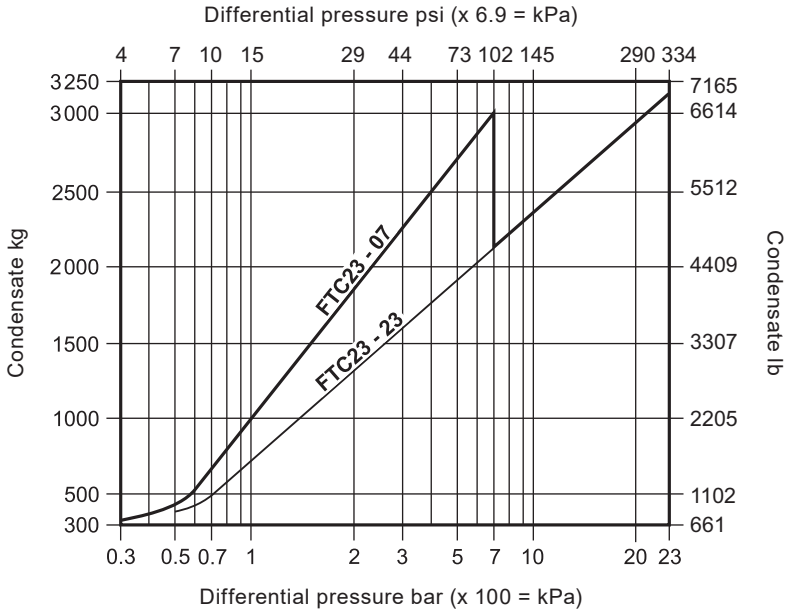
Capacities

The condensate discharge capacities are based on the actual temperature of operation.



The choice of trap should be based on the following data:

- Hourly amount of condensate to be discharged
- Effective differential pressure

Safety factors:

- 1.25 ÷ 1.5 with continuous duty
- 2 ÷ 3 with intermittent duty

Safety information, installation and maintenance
For full details see the Installation and Maintenance Instructions (IM-P605-02) supplied with the product.

Installation note
FT_23 ball float steam traps must be installed below the draining point with the direction of flow as indicated on the body and with the float lever positioned in a horizontal plane so that it rises and falls freely. For optimum working conditions and protection of the unit it is recommended that a strainer be installed upstream to prevent possible damage to the internal mechanism and to ensure peak operation within your plant.
In order to allow simple and safe inspection for cleaning or maintenance purposes install suitable isolation valves. If the trap is to discharge to atmosphere ensure that it is to a safe place, the discharged medium may be at a temperature of 100 °C. In order to ensure an efficient discharge of incondensable medium, it is recommended that a balance line be connected to a drain system (reference the Installation and Maintenance Instructions that are supplied with the unit).

Disposal
The product is recyclable. No ecological hazard is anticipated with the disposal of this product providing due care is taken.
In the event that, during the operation, the trap comes into contact with harmful substances, you will need to dispose of it in accordance with regulations under the current legislation.

How to order
Example: 1 off Spirax Sarco DN50 FTC23-23 carbon steel ball float steam trap with flanged EN 1092 PN40 connections.

Spare parts

The spare parts available are shown in solid outline. Parts drawn in a grey line are not supplied as spares.

Available spares

Valve seat assembly	**6, 8**
Valve ball	**9**
Ball float lever and pin assembly	**10, 11**
Float assembly	**12, 13, 14**
Manual lever kit	**15, 16, 17, 18, 19, 20**
Stuffing box and manual lever spacer assembly	**16, 17**
Gasket set (3 + 3 units)	**3, 7**

How to order spares

Always order spare parts by using the description given in the table above and state the size and type of ball float steam trap, including its pressure range and type of connections.

Example:
1 off Ball float lever and pin assembly for a DN50 Spirax Sarco FTC23-07 ball float steam trap having EN 1092 PN40 connections.
