

M10Si ISO Ball Valve DN $\frac{1}{4}$ " to DN $2\frac{1}{2}$ "

Description

The M10Si ISO three-piece body ball valve has been designed for use as an isolating valve, not a control valve, has a lockable handle as standard and can be serviced without removal from the pipeline (screwed and welded versions only). It can be used for steam and other industrial fluids for services ranging from vacuum to the higher temperatures and pressures.

ISO mounting

The integral ISO body mounting allows the valve to be automated without losing seal integrity, as the body does not require disassembly. Manual to remote control may therefore be easily accomplished by the ISO range of Spirax Sarco ball valves.

Available types

M10Si2_ _ ISO Zinc plated carbon steel body, PDR 0.8 seats.

M10Si3_ _ ISO Stainless steel body, PDR 0.8 seats.

M10Si4_ _ ISO Complete stainless steel, PDR 0.8 seats.

Note: The nomenclature will be followed with either FB (full bore) or RB (reduced bore).
