M21Hi ISO **Reduced Bore Ball Valve DN15 to DN150 Flanged PN40**

Description

The M21Hi is a reduced bore ball valve, with a single piece body, having ISO mounting as standard. As a main feature the valve has a special ball which has received a surface hardening and also benefits from having reinforced PEEK seats.

The M21Hi can be used on applications that use steam and other industrial fluids for services ranging from vacuum to the higher temperatures and pressures. The M21Hi has been designed for use as an isolating valve, not a control valve.

Available types

M21Hi2 ISO Zinc plated carbon steel body, reinforced PEEK seats.

M21Hi3 ISO Stainless steel body, reinforced PEEK seats.
