

Description

The M21HTi is a reduced bore ball valve, with a single piece body, having ISO mounting as standard. As a main feature the valve has a special ball which has received a surface hardening and also benefits from having Virgin PEEK seats. The M21HTi can be used on applications that use steam and other industrial fluids for services ranging from vacuum to the higher temperatures and pressures. The M21HTi has been designed for use as an isolating valve, not a control valve.

Available types

M21HTi2 ISO	Zinc plated carbon steel body, Virgin PEEK seats.
M21HTi3 ISO	Stainless steel body, Virgin PEEK seats.

Standards

This product fully complies with the requirements of the European Pressure Equipment Directive 97/23/EC and carries the **C E** mark when so required.

Technical data

Certification

This product is available with certification to EN 10204 3.1. **Note:** All certification/inspection requirements must be stated at the time of order placement.

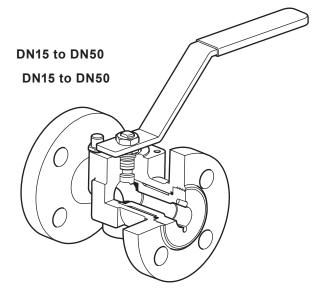

Sizes and pipe connections

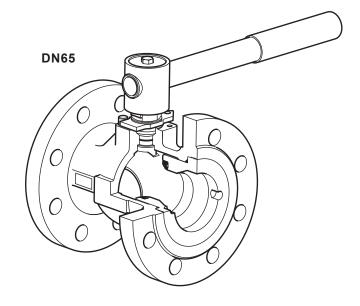

DN15, DN20, DN25, DN32, DN40, DN50, DN65, DN80, DN100 and DN150 Standard flange: EN 1092 PN40 Face-to-face dimensions:

DN15 to DN100 according to DIN 3202 F4.

DN25 to DN150 according to BS 2080.

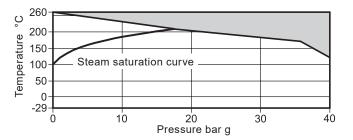

Flow characteristic	Modified linear
Port	Reduced bore
Leakage test procedure t	o ISO 5208 (Rate A)/EN 12266-1 (Rate A)
Antistatic device	Complies with ISO 7121 and BS 5351

TI-P133-86 ST Issue 1

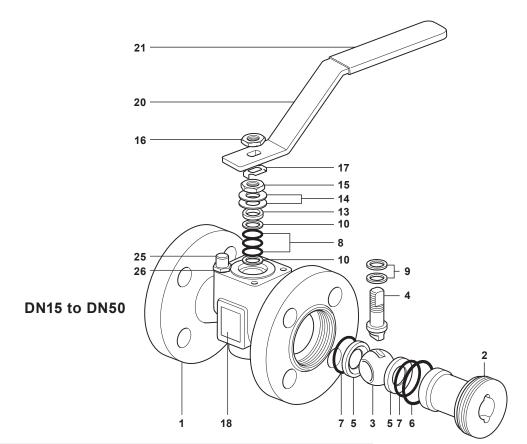

Pressure/temperature limits

Body design conditions F PMA Maximum allowable pressure 40 bar g @ 12 TMA Maximum allowable temperature 260 °C @ 0 Minimum allowable temperature -2 PMO Maximum allowable temperature -2
TMA Maximum allowable temperature 260 °C @ 0 Minimum allowable temperature -2
Minimum allowable temperature -2
PMO Maximum operating pressure for saturated steam service 17.5
TMO Maximum operating temperature 260 °C @ 0
Minimum operating temperature -2 Note: For lower operating temperatures consult Spirax Sarco
ΔPMX Maximum differential pressure is limited to the PMO
Designed for a maximum cold hydraulic test pressure of 60

Kv values

DN	15	20	25	32	40	50	65	80	100	150
Kv	10	10	30	40	81	103	197	248	581	735

For conversion Cv (UK) = Kv x 0.963 Cv (US) = Kv x 1.156

Operating torque (N m)

DN	15	20	25	32	40	50	65	80	100	150
N m	15	15	20	25	35	60	100	120	170	400

Note: The torque figures shown are for a valve that is frequently operated at the maximum operating pressure. Valves that are subject to long static periods, may require a greater break-out torque.

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions supplied with the product.

How to order	
--------------	--

Specify	Pody motorial	2 = Zinc plated carbon steel
	Body material	3 = Stainless steel

Example: 1 off Spirax Sarco DN50 M21HTi2 ISO ball valve having flanged EN 1092 PN40 connections. Face-to-face according to BS 2080.

Optional extras:

- Self-venting ball.
- Extended stems to allow full insulation: 50 mm (2") for the DN15 to DN50 and 100 mm (4") for the DN15 to DN150.
- Lockable handle.
- 100 mm extended stem with lockable handle.

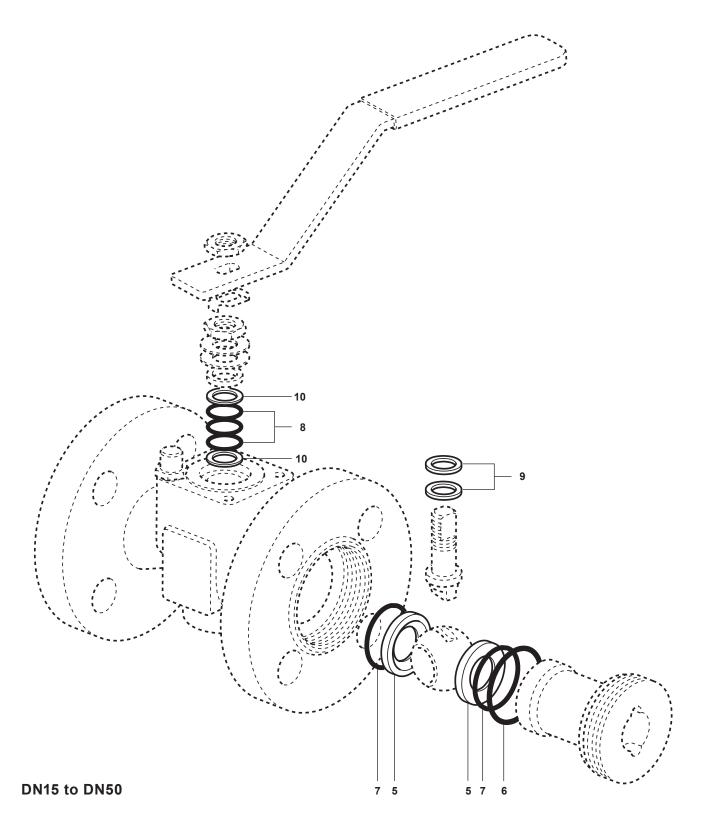

DN15 to DN50 - Spare parts (see page 9 for sizes DN65 - DN150) The spare parts available are shown in solid outline. Parts drawn in broken line are not supplied as spares.

Available spares

Seats, insert gasket, seat 'O' rings and stem seals	5, 6, 7, 8, 9, 10
---	-------------------

How to order spares

Always order spares by using the description given in the column headed 'Available spares' and state the size and type of ball valve. Example: 1 set of seats, insert gasket, seat 'O' rings and stem seals for a Spirax Sarco DN50 flanged PN40 M21HTi2 ball valve.

DN65 to DN150 - Spare parts (see page 8 for sizes DN15 - DN50) The spare parts available are shown in solid outline. Parts drawn in broken line are not supplied as spares.
