# Reduced Bore Ball Valve for the Tobacco Industry DN15 to DN150 Flanged PN40

#### Description

The M21Ti is a reduced bore ball valve, with a single piece body, having ISO mounting as standard. As a main feature the valve has UHMWPE seats.

The M21Ti has been designed for use as an isolating valve, not a control valve, and can be used on Teflon free process applications at moderate temperatures. The M21Ti ISO is not suitable for steam applications.

# Available types

M21Ti2 ISO Zinc plated carbon steel body, UHMWPE seats. M21Ti3 ISO Stainless steel body, UHMWPE seats.

For full details see the Installation and Maintenance Instructions supplied with the product.

#### Welding

Only the models that have connections designed for welding (SW, BW, Imperial Tube connections) should be welded. Valves with flanged connections must not be welded to avoid damages to the valve and/or injury to personnel.
