

M40Hi ISO Reduced Bore Ball Valve DN25 to DN150 Flanged ASME 150 and ASME 300

DN25 to DN50

DN65

Description

The M40Hi is a reduced bore ball valve, with a single piece body, having ISO mounting as standard. As a main feature the valve has a special ball which has received a surface hardening and also benefits from having reinforced PEEK seats.

The M40Hi has been designed for use as an isolating valve, not a control valve and can be installed in high temperature applications such as steam up to 39 bar g and thermal oils.

Available types

M40Hi2 ISO Zinc plated carbon steel body, reinforced PEEK seats.

M40Hi3 ISO Stainless steel body, reinforced PEEK seats.

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions supplied with the product.

Welding

Only the models that have connections designed for welding (SW, BW, Imperial Tube connections) should be welded. Valves with flanged connections must not be welded to avoid damages to the valve and/or injury to personnel.
