

spirax sarco M40Ti ISO **Reduced Bore Ball Valve for the Tobacco Industry** DN25 to DN200 Flanged ASME 150 and ASME 300

Description

The M40Ti is a reduced bore ball valve, with a single piece body, having ISO mounting as standard. As a main feature the valve has UHMWPE seats.

The M40Ti has been designed for use as an isolating valve, not a control valve, and can be used on Teflon free process applications at moderate temperatures. The M40Ti ISO is not suitable for steam applications.

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions supplied with the product.

Welding

Only the models that have connections designed for welding (SW, BW, Imperial Tube connections) should be welded. Valves with flanged connections must not be welded to avoid damages to the valve and/or injury to personnel
