Spira-trol™ Two-port Control Valves EN Standard LE, LF and LL DN15 to DN100 and ASME Standard LEA, LFA and LLA ½" to 4"

Description

Spira-trol™ is a range of two-port single seat globe valves with cage retained seats conforming to EN and ASME standard. These valves are available in three body materials in sizes ranging from DN15 to DN100 (½" to 4"). When used in conjunction with a pneumatic or electric linear actuator they provide characterized modulating or on/off control.

Spira-trol valve characteristic - options:

LE and **LEA** **Equal percentage (E) -** Suitable for most modulating process control applications providing good control at all flowrates.

LF and **LFA** **Fast opening (F) -** For on/off applications only.

LL and **LLA** **Linear (L) -** Primarily for liquid flow control where the differential pressures across the valve is constant.

Important note: Throughout this document, reference has been made to the standard LE or LEA control valve. With the exception of trim type, the LE, LEA, LF, LFA, LL and LLA control valves are identical.

Spira-trol valve options:

Stem sealing	**PTFE chevron seals**	Standard
	Bellows/graphite secondary seals (D)	Zero emissions and high temperature applications
	Graphite packing	High temperature applications
Seating	**Metal-to-metal**	431 stainless steel - standard
		316L stainless steel
	Soft seating	Up to 200 °C (392 °F) - PTFE for Class VI shut-off
		Up to 250 °C (482 °F) - PEEK for Class VI shut-off
	Hard facing	316L stainless steel with Stellite 6 facing - for more arduous applications
Bonnet type	Standard bonnet	
	Extended bonnet for large pipe lagging or hot/cold applications	
Trim	Standard trim	
	Low noise and anti-cavitation trim (see TI-S24-59)	

Spira-trol valves are compatible with the following actuators and positioners:

Electric	AEL3, AEL5 and AEL6 series
Pneumatic	PN1000, PN9000, PN2000, TN2000 and TN2100 Series

Refer to the relevant Technical Information sheet for further details.

Standards

Designed in accordance with EN 60534. This product fully complies with the requirements of the Pressure Equipment Directive and carries the CE mark when so required.

Certification

This product is available with certification to EN 10204 3.1.
Note: All certification/inspection requirements must be stated at the time of order placement.

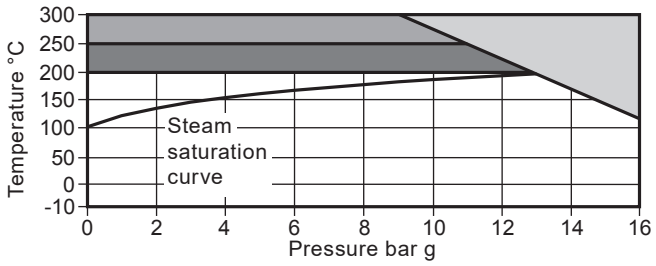
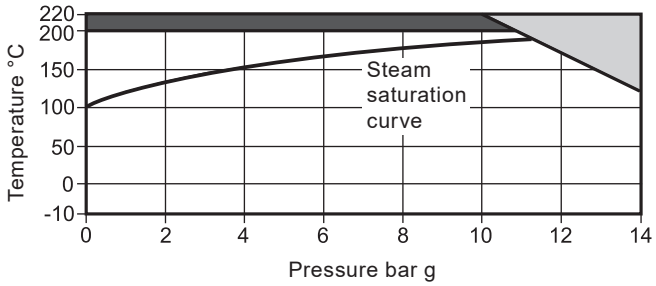
Pressure/temperature limits - LE31 and LE33 cast iron valve body

Screwed BSP
Flanged EN 1092 PN16



Note:
When the process fluid temperature is sub-zero and the ambient temperature is below +5 °C, the external moving parts of the valve and actuator must be heat traced to maintain normal operation.

Flanged JIS/KS 10



The product **must not** be used in this region.

High temperature graphite packing is required for use in this region.
Note: Soft seated valves cannot be used in this region.

PTFE soft seated valves are limited to a maximum operating temperature of 200 °C.

Spare parts

Spira-trol™ - L series

The spare parts available are shown in solid outline. Parts drawn in a grey line are not supplied as spares.

Note: When placing an order for spare parts please specify clearly the full product description as found on the label of the valve body, as this will ensure that the correct spare parts are supplied.

Available spares

Actuator clamping nut		**A**
Gasket set	(Non-bellows sealed)	**B, G**
Stem seal kits	**PTFE** packing	**C**
	Graphite packing	**C1**
	Graphite seal set	**C2**
Plug stem and seat kit	(No gaskets supplied)	**D, E**
PTFE or **PEEK soft seat seal**		**H**
		B, G, C1
Stem packing and gasket		**B, G, C**
		B, G, C2
Soft seat set		**H1**

Specify if reduced trim.

How to order spares
Always order spares by using the description given in the column headed 'Available spares', and state the size and type of valve including the full product description of the product.

Example:
1 - PTFE stem seal kit for a Spirax Sarco Spira-trol™ DN25 LE43PTSUSS.2 K_V 10 two-port control valve.

How to fit spares
Full fitting instructions are given in the Installation and Maintenance Instructions supplied with the spare.
