

# Spira-trol™ Two-port Control Valves

## K Series DN125 to DN300 and 6" to 12"

### Description

Spira-trol™ is a range of two-port single seat globe valves with cage retained seats conforming to EN and ASME standard. These valves are available in three body materials in sizes ranging from DN125 to DN300 (6" to 12"). When used in conjunction with a pneumatic or electric linear actuator they provide characterized modulating or on/off control.

**Important note:** Throughout this document, reference has been made to the standard KE or KEA control valve. With the exception of trim type, the KE, KEA, KF, KFA, KL and KLA control valves are identical.

**KE, KF and KL**  
 DN125 to DN300

**KEA, KFA and KLA**  
 6" to 12"

### Sizes and pipe connections

Valve Series	Material	PN16	PN25	PN40	JIS/KS10	JIS/KS20	ASME150	ASME300	
KE	SG Iron	DN125 - DN200			DN125				
	Carbon Steel	DN125 - DN300							
	Stainless Steel	DN125 - DN200							
KEA	Carbon Steel						6" - 12"	6" - 12"	
	Stainless Steel						6" and 8"	6" and 8"	

ASME 150 and ASME 300 are available with Flat face for use with ASME 125 and ASME 250 Flange.

### Standards

Designed in accordance with EN 60534. This product fully complies with the requirements of the EU Pressure Equipment Directive/UK Pressure Equipment (Safety) Regulations and carries the mark when so required.

### Certification

This product is available with certification to EN 10204 3.1. Optional seat leak test is available on request.

**Note:** All certification/inspection requirements must be stated at the time of order placement.

**Spira-trol™ valve characteristic - options:**

**KE and KEA Equal percentage (E)** - Suitable for most modulating process control applications providing good control at all flowrates.

**KF and KFA Fast opening (F)** - For on/off applications only.

**KL and KLA Linear (L)** - Primarily for liquid flow control where the differential pressures across the valve is constant.

**Spira-trol™ valve options:**

<b>Stem sealing</b>	<b>PTFE chevron seals</b>	Standard
	<b>Graphite packing</b>	High temperature applications
	<b>Metal-to-metal</b>	431 stainless steel - standard
<b>Seating</b>	<b>Soft seating</b> (not available in DN300)	Up to 170 °C (338 °F) - PTFE for Class VI shut-off (for applications like compressed air or water where there is no temperature)
		Up to 250 °C (482 °F) - PEEK for Class VI shut-off
		Up to 220 °C (428 °F) - PEEK (P) for Class VI shut-off
	<b>Hard facing</b>	316L stainless steel with Stellite™ 6 facing - for more arduous applications
<b>Bonnet type</b>	Standard bonnet	
	Extended bonnet for large pipe lagging or hot/cold applications	
<b>Trim</b>	Standard trim	
	Low noise and anti-cavitation trim (see TI-S24-59)	

**Spira-trol™ valves are compatible with the following actuators and positioners:**

**Electric** AEL7

**Pneumatic** PN1000, PN2000, PN9000 and TN2000 series

**Please refer to respective data sheets.**

For Special trims please refer to TI-S24-59

For DN15-100 version please refer to TI-S24-71 & TI-S24-72

For smart positioner please refer to TI-P706-01, TI-P706-04 and TI-P707-02

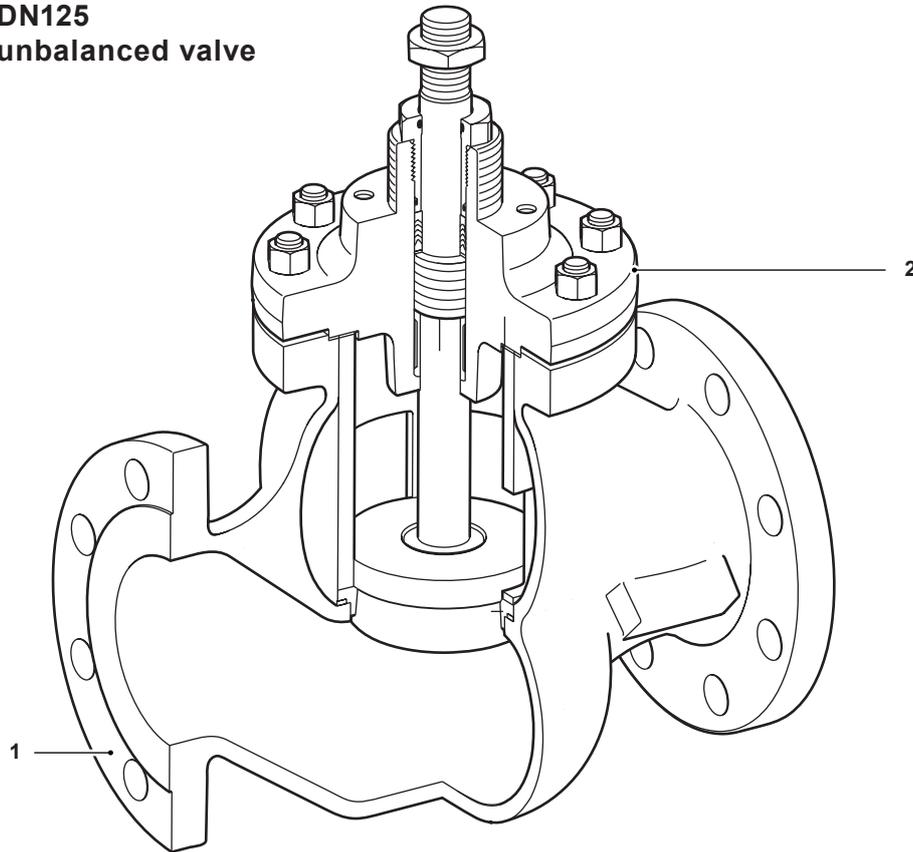

For pneumatic positioners please refer to TI-P704-01

For electro-pneumatic positioners please refer to TI-P703-01 and TI-P703-03

## Materials - DN125 to DN300 (6" to 12")

Body material	Type	No. Part	Material
Carbon steel	<b>KE43</b>	1 Body	Cast steel BS EN 10213 GP 240GH+N (1.0619N)
		2 Bonnet	Cast steel BS EN 10213 GP 240GH+N (1.0619N)
	<b>KEA43</b>	1 Body	Cast steel ASTM A216 WCB
		2 Bonnet	Cast steel ASTM A216 WCB
Stainless steel	<b>KE63</b>	1 Body	Stainless steel EN 10213 (1.4408)
		2 Bonnet	Stainless steel EN 10213 (1.4408)
	<b>KEA63</b>	1 Body	Stainless steel ASTM A351 CF8M
		2 Bonnet	Stainless steel ASTM A351 CF8M
SG iron	<b>KE73</b>	1 Body	SG iron EN-GJS-400-18U-LT
		2 Bonnet	SG iron EN-GJS-400-18U-LT

**DN125  
unbalanced valve**

**Note:** For low noise and anti-cavitation C<sub>v</sub> please see TI-S24-59

## Pressure / temperature limits - KE43 (Carbon steel)

- The product **must not** be used in this region.
- High temperature packing is required for use in this region.
- High temperature bolting and packing is required for use in this region
- A - B** Flanged EN 1092 PN40.
- A - C** Flanged JIS/KS 20K.
- A - D** Flanged EN 1092 PN25.
- A - E** Flanged EN 1092 PN16.
- A - F** Flanged JIS/KS 10K.

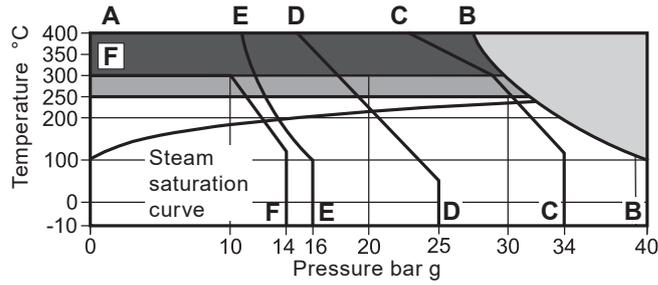

### Notes:

1. Where the process fluid temperature is sub-zero and the ambient temperature is below +5 °C, the external moving parts of the valve and actuator must be heat traced to maintain normal operation.
2. When selecting a valve with a bellows sealed bonnet, the pressure / temperature limits of the bellows must be read in conjunction with the valve pressure / temperature limits shown in table below.

<b>Body design conditions</b>	PN40	
<b>Maximum design pressure</b>	40 bar g @ 50 °C	
<b>Maximum differential pressure design</b>	PTFE soft seat (G)	7 bar
	PEEK soft seat (K)	7 bar
	Full PEEK seat (P)	19 bar
<b>Maximum design temperature</b>	400 °C	
<b>Minimum design temperature</b>	-10 °C	
<b>Maximum operating temperature</b>	PTFE soft seat (G)	170 °C
	PEEK soft seat (P)	220 °C
	Standard packing PTFE chevron	
	PEEK seat (K)	250 °C
	Extended bonnet (E) with PTFE chevron	
	High temperature packing (H)	
	Extended bonnet (E) with graphite packing	400 °C

**Note:** We recommend that an extended bonnet (E) with graphite packing is used where valve operation is above 300 °C.

## Pressure / temperature limits - KE63 (Stainless steel)

-  The product **must not** be used in this region.
-  High temperature packing is required for use in this region.
-  High temperature bolting and packing is required for use in this region
- A - B** Flanged EN 1092 PN40.
- A - C** Flanged JIS/KS 20K.
- A - D** Flanged EN 1092 PN25.
- A - E** Flanged EN 1092 PN16.
- A - F** Flanged JIS/KS 10K.

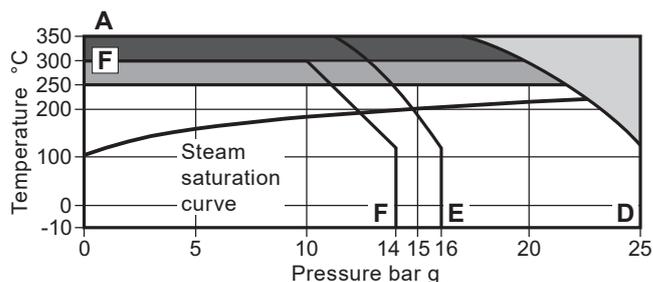

### Notes:

1. Where the process fluid temperature is sub-zero and the ambient temperature is below +5 °C, the external moving parts of the valve and actuator must be heat traced to maintain normal operation.
2. When selecting a valve with a bellows sealed bonnet, the pressure/temperature limits of the bellows must be read in conjunction with the valve pressure/temperature limits shown in table below.

<b>Body design conditions</b>		PN40
<b>Maximum design pressure</b>		40 bar g @ 50 °C
<b>Maximum differential pressure design</b>	PTFE soft seat (G)	7 bar
	PEEK soft seat (K)	7 bar
	Full PEEK seat (P)	19 bar
<b>Maximum design temperature</b>		400 °C
<b>Minimum design temperature</b>		-10 °C
<b>Maximum operating temperature</b>	PTFE soft seat (G)	170 °C
	PEEK soft seat (P)	220 °C
	Standard packing PTFE chevron	.....
	PEEK seat (K)	250 °C
	Extended bonnet (E) with PTFE chevron	.....
	High temperature packing (H)	.....
	Extended bonnet (E) with graphite packing	400 °C

**Note:** We recommend that an extended bonnet (E) with graphite packing is used where valve operation is above 300 °C.

## Pressure / temperature limits - KE73 (SG iron)

- The product **must not** be used in this region.
- High temperature packing is required for use in this region.
- High temperature bolting and packing is required for use in this region

**A - D** Flanged EN 1092 PN40.

**A - E** Flanged EN 1092 PN16.

**A - F** Flanged JIS/KS 10.

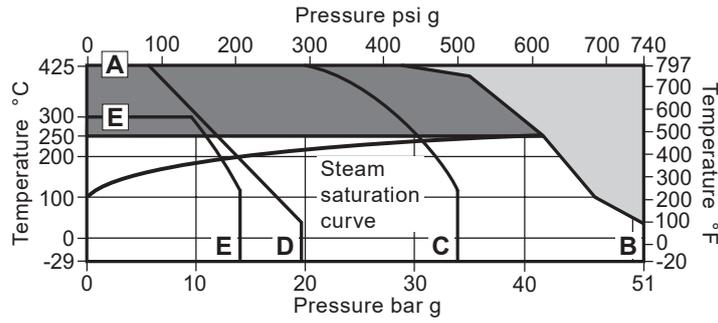

### Notes:

1. Where the process fluid temperature is sub-zero and the ambient temperature is below +5 °C, the external moving parts of the valve and actuator must be heat traced to maintain normal operation.
2. When selecting a valve with a bellows sealed bonnet, the pressure/temperature limits of the bellows must be read in conjunction with the valve pressure/temperature limits shown in table below.

<b>Body design conditions</b>	PN25														
<b>Maximum design pressure</b>	25 bar g @ 120 °C

**Note:** We recommend that an extended bonnet (E) with graphite packing is used where valve operation is above 300 °C.

## Pressure / temperature limits - KEA43 (Carbon steel)

- The product **must not** be used in this region.
- Graphite stem sealing is required for use in this region

- A - B** Flanged ASME 300.
- A - C** Flanged JIS/KS 20.
- A - D** Flanged ASME 150.
- E - E** Flanged JIS/KS 10.

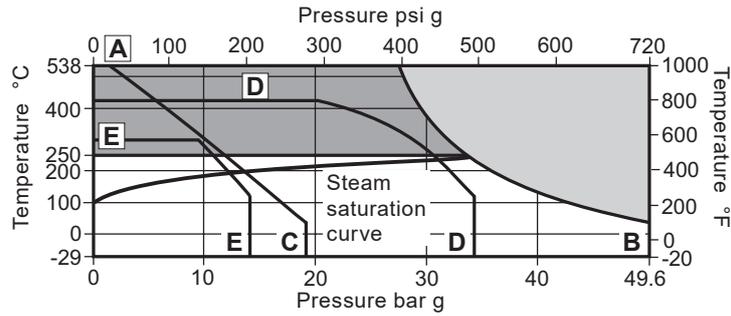

### Notes:

1. Where the process fluid temperature is sub-zero and the ambient temperature is below +5 °C, the external moving parts of the valve and actuator must be heat traced to maintain normal operation.
2. When selecting a valve with a bellows sealed bonnet, the pressure/temperature limits of the bellows must be read in conjunction with the valve pressure/temperature limits shown above.
3. As standard the KEA, KFA, KLA series two-port control valves are supplied with the PTFE stem sealing option.

Body design conditions		ASME 150 and ASME 300	
<b>Maximum design pressure</b>	ASME 150	19.6 bar g @ 38 °C	(284 psi g @ 100 °F)
	ASME 300	51.1 bar g @ 38 °C	(740 psi g @ 100 °F)
<b>Maximum differential pressure design</b>	PTFE soft seat (G)	7 bar	
	PEEK soft seat (K)	7 bar	
	Full PEEK seat (P)	19 bar	
<b>Maximum design temperature</b>		425 °C	(800 °F)
<b>Minimum design temperature</b>		-29 °C	(-20 °F)
<b>Maximum operating temperature</b>	PTFE soft seat (G)	170 °C	(338 °F)
	PEEK soft seat (P)	220 °C	(428 °F)
	Standard packing PTFE chevron		
	PEEK seat (K)	250 °C	(482 °F)
	Extended bonnet (E) with PTFE chevron		
	Graphite packing (H)		
	Extended bonnet (E) with graphite packing	425 °C	(800 °F)

**Note:** We recommend that an extended bonnet (E) with graphite packing is used where valve operation is above 300 °C (572 °F).

## Pressure/temperature limits - KEA63 (Stainless steel)

 The product **must not** be used in this region.

 Graphite stem sealing is required for use in this region

**A - B** Flanged ASME 300.

**A - C** Flanged JIS/KS 20.

**D - D** Flanged ASME 150.

**E - E** Flanged JIS/KS 10.

### Notes:

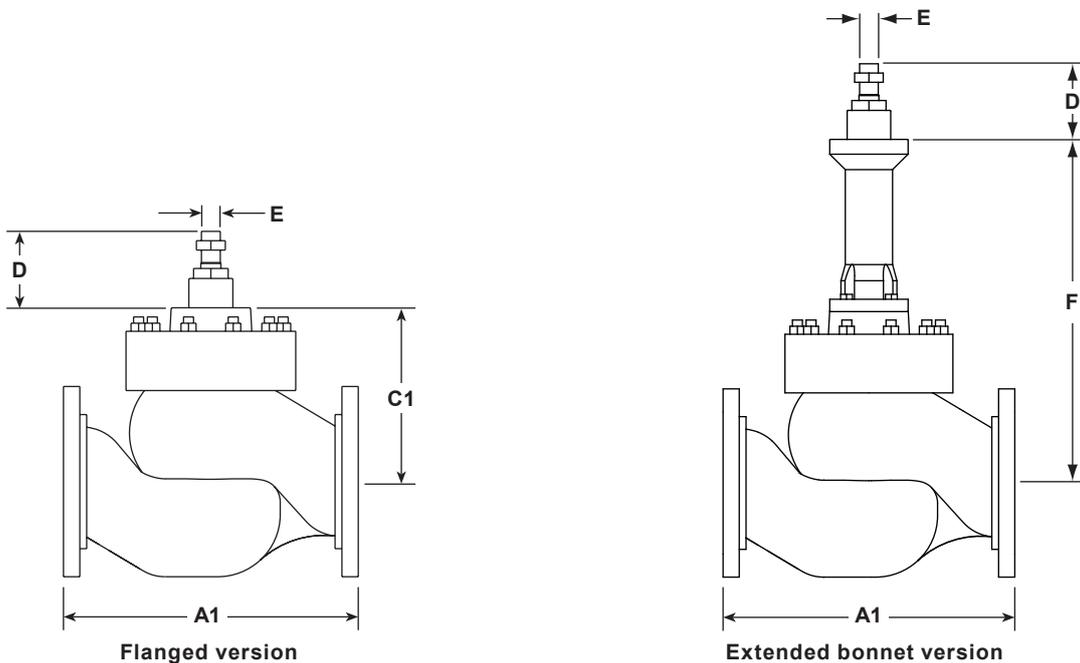

1. Where the process fluid temperature is sub-zero and the ambient temperature is below +5 °C, the external moving parts of the valve and actuator must be heat traced to maintain normal operation.
2. When selecting a valve with a bellows sealed bonnet, the pressure/temperature limits of the bellows must be read in conjunction with the valve pressure/temperature limits shown above.
3. As standard the KEA, KFA, KLA series two-port control valves are supplied with the PTFE stem sealing option.

Body design conditions		ASME 150 and ASME 300	
<b>Maximum design pressure</b>	ASME 150 (6" to 8" only)	19.6 bar g @ 38 °C	(275 psi g @ 100 °F)
	ASME 300	49.6 bar g @ 38 °C	(720 psi g @ 100 °F)
<b>Maximum differential pressure design</b>	PTFE soft seat (G)	7 bar	
	PEEK soft seat (K)	7 bar	
	Full PEEK seat (P)	19 bar	
<b>Maximum design temperature</b>		538 °C	(1000 °F)
<b>Minimum design temperature</b>		-29 °C	(-20 °F)
<b>Maximum operating temperature</b>	PTFE soft seat (G)	170 °C	(338 °F)
	PEEK soft seat (P)	220 °C	(428 °F)
	Standard packing PTFE chevron		
	PEEK seat (K)	250 °C	(482 °F)
	Extended bonnet (E) with PTFE chevron		
<b>Maximum operating temperature</b>	Graphite packing (H)		
	Extended bonnet (E) with graphite packing	538 °C	(1000 °F)

**Note:** We recommend that an extended bonnet (E) with graphite packing is used where valve operation is above 300 °C (572 °F).

## Spare parts

### Spira-trol™ two-port control valve Balanced and unbalanced DN125 to DN300 and 6" to 12"

The spare parts available are shown in solid outline. Parts drawn in a grey line are not supplied as spares.

**Note:** When placing an order for spare parts please specify clearly the full product description as found on the label of the valve body, as this will ensure that the correct spare parts are supplied.

#### Available spares - K series

<b>Gasket set</b> Non bellows sealed	<b>Balanced</b>	<b>A, B, G</b>
	<b>Unbalanced</b>	<b>B, G</b>
<b>Stem seal kit</b>	<b>PTFE chevrons</b>	<b>C3</b>
	<b>Graphite packing conversion kit (DN125 to DN300)</b>	<b>C4</b>
	<b>Graphite seal set</b>	<b>C5</b>
<b>Plug stem and seat kit</b>	<b>Balanced</b> (No gaskets supplied)	<b>A, D, E</b>
	<b>Unbalanced</b> (No gaskets supplied)	<b>D, E</b>

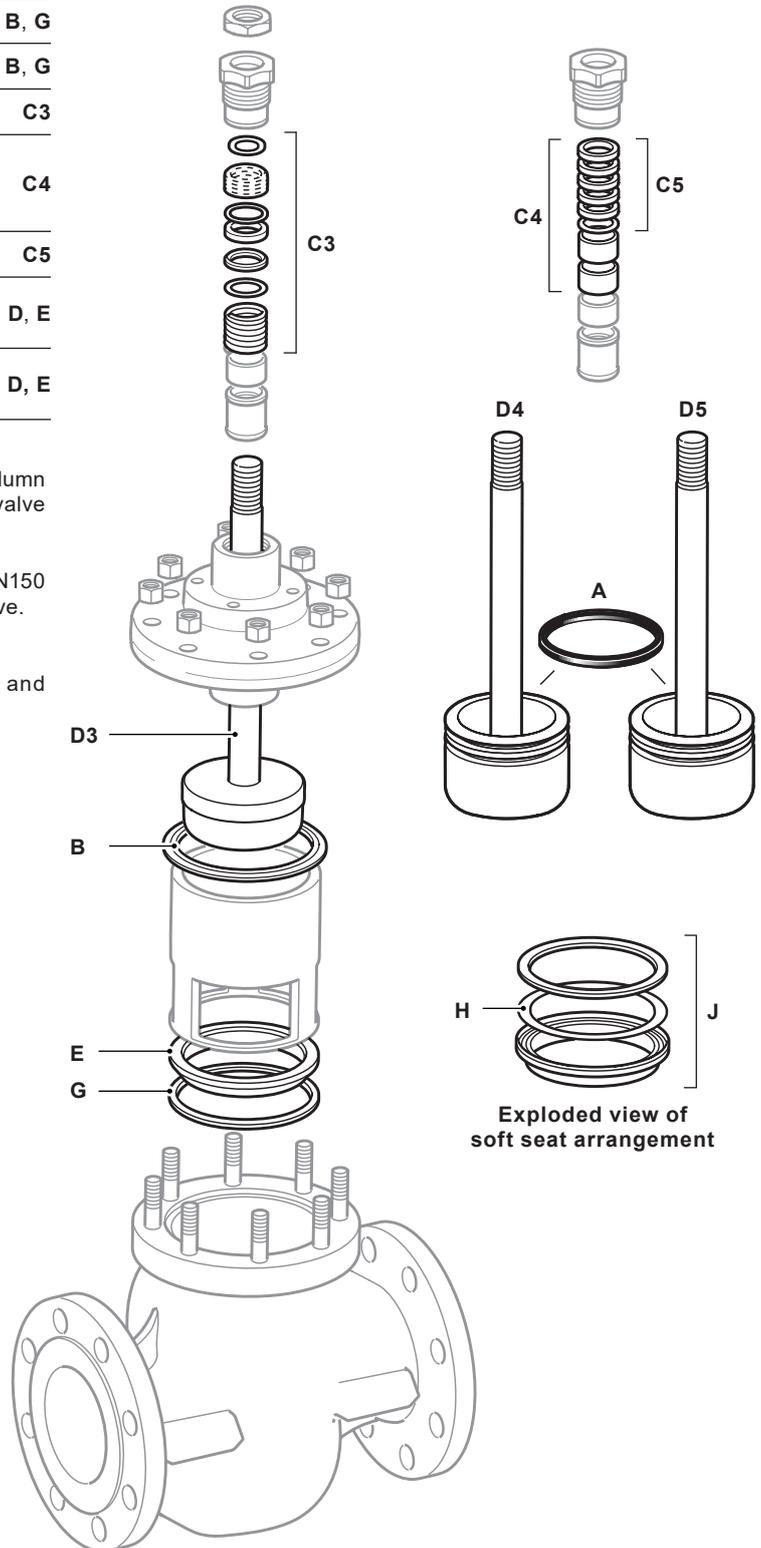

#### How to order spares

Always order spares by using the description given in the column headed 'Available spares', and state the size and type of valve including the full product description of the product.

**Example:** 1 - PTFE stem seal kit for a Spirax Sarco DN150 Spira-trol™ two-port KE43 PTSBSS.2 Kvs 370 control valve.

#### How to fit spares

Full fitting instructions are given in the Installation and Maintenance Instructions supplied with the spare.

## Spira-trol™ selection guide:

<b>Valve size</b>	EN standard = DN125, DN150, DN200, DN250 and 300 ASME standard = 6", 8", 10" and 12"	<b>DN150</b>
<b>Valve series</b>	K = K series 2-port control valve	<b>K</b>
