 ST Issue 3

TP1, TP2, TP3 and Spacer Ring Stainless Steel Temporary Strainers

Description

Temporary strainers have been designed to fit between two flanges and are generally used during commissioning and start-up to remove any coarse debris. They are available in three designs (TP1, TP2 and TP3 as illustrated below) to suit a wide range of fluids for applications in process lines, hot water systems, steam and condensate systems etc. The standard screens are manufactured using 304L or 316L stainless steel and have 3 mm perforations. Other perforations or material of construction are available on request. Temporary strainers are not intended to be used for permanent applications. Contact Spirax Sarco when permanent applications are required. After commissioning and start-up the temporary strainer should be removed from the pipeline and replaced with a spacer ring.

Standards

These products fully comply with the requirements of the European Pressure Equipment Directive 97 / 23 / EC and carry the **CE** mark when so required.

Certification

These products are available with certification to EN 10204 3.1 and NACE approval. **Note:** All certifications/inspections requirements must be stated at the time of order placement.

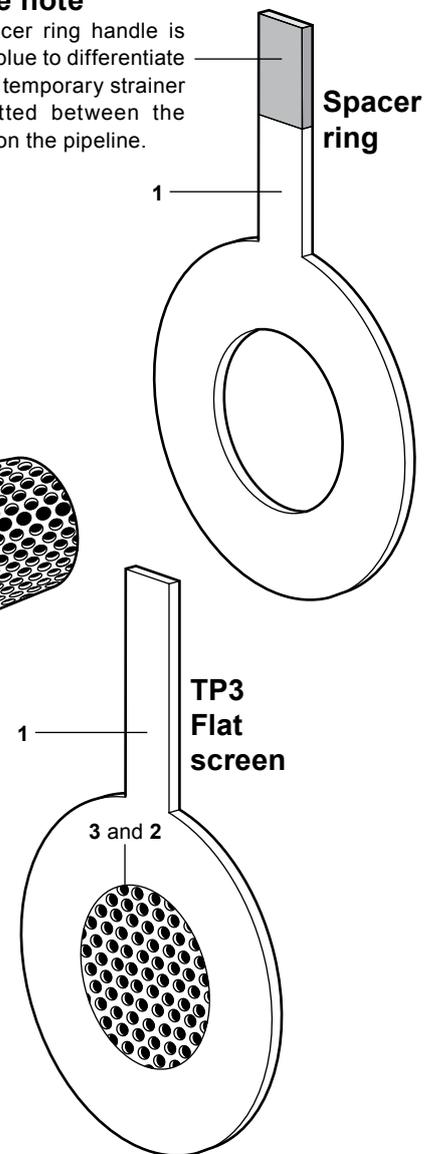

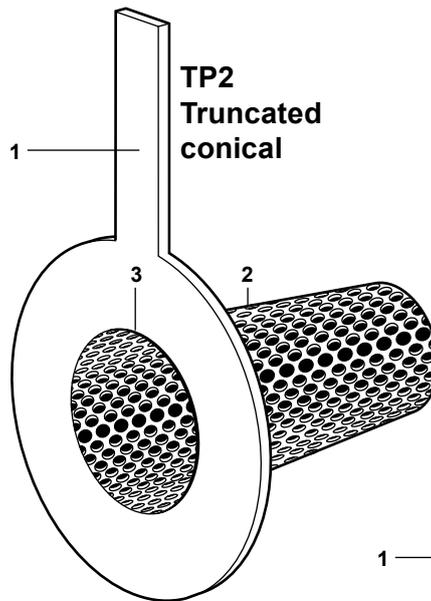

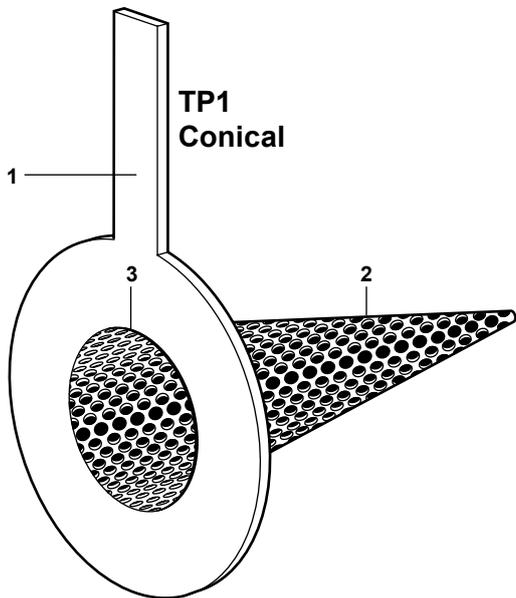

Sizes and pipe connections

DN40 - DN700 (1½" - 28")

Designed for installation between the following flanges:
 EN 1092 PN10, PN16, PN25 and PN40 or
 ASME 150, ASME 300 and ASME 600

Please note

The spacer ring handle is painted blue to differentiate it from a temporary strainer when fitted between the flanges on the pipeline.

Materials

No.	Part	Material
1	Collar	Stainless steel AISI 304L or AISI 316L
2	Screen	Stainless steel AISI 304L or AISI 316L
3	Mesh lining	Stainless steel AISI 304L or AISI 316L

Optional extras

The following optional extras are available for all unit sizes at an extra cost and must be stated at the time of order placement:

Perforations: 3 mm (standard), 1.6 mm and 6 mm. Contact Spirax Sarco for availability of perforations not displayed.

Mesh: M40, M100 and M200. Contact Spirax Sarco for availability of mesh screens not displayed.

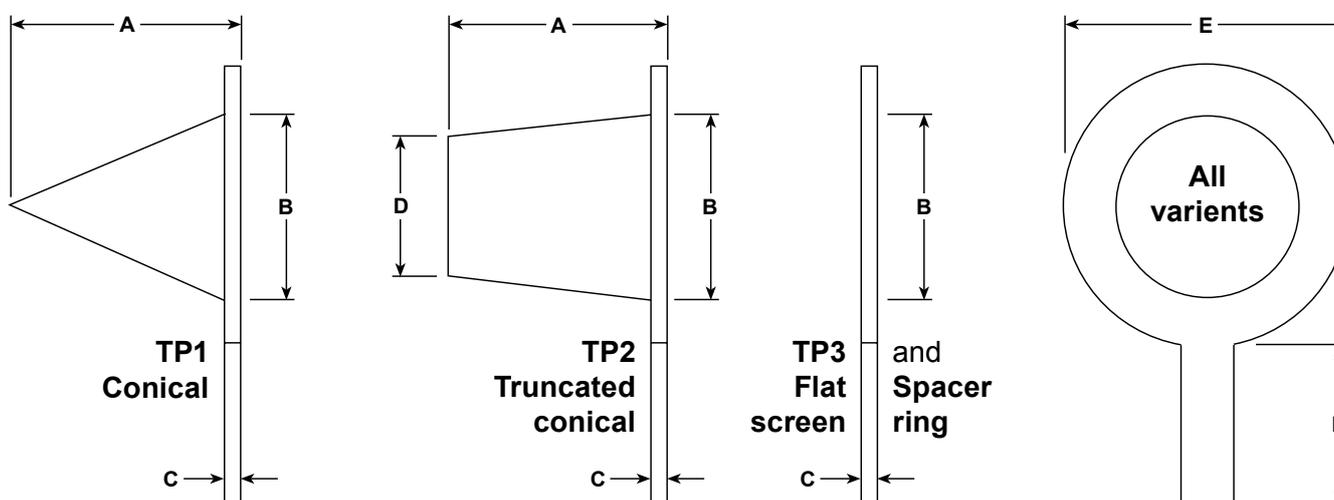

Screen material: AISI 304L (standard), AISI 316L and Monel 400.

Specific surface finish for collar: Ra 0.025 µm to 50 µm.

First for Steam Solutions

Safety information, installation and maintenance

For full details see the installation and maintenance instructions (IM-P169-07) supplied with the product.

Warning: Carry strainers with gloves.

Disposal: These products are recyclable. No ecologic hazard is anticipated with disposal of these products providing due care is taken.

How to order

Example: 1 off Spirax Sarco DN100 TP1 temporary conical shaped strainer having the standard 100% stainless steel screen with 3 mm perforations, for installation between EN 1092 PN25 flanges.
