

# Need a control valve in a hurry?

**4** or **less**  
**days** That's how quick we can deliver a new control valve to you

## Get your Spira-trol™ control valve in industry leading availability.

The Spirax Sarco Spira-trol™ control valve Quick Ship program has been designed to allow the control valve to be readily configured, built and shipped within 4 business days or less and **now includes the Steam-Tight PEEK seat**. This full PEEK class VI, double life seat optimizes system efficiency, sustainability, and control. Designed to meet the demands of today's industries, the Spirax Sarco Spira-trol™ control valve is robust, innovative and a cost effective solution.

## Quick and easy maintenance

Spirax Sarco is an industry leader in steam, with expertise in the field of steam controls. We specialize in control applications in both steam and condensate systems. Why not take advantage of our experience and know-how?

Our Spira-trol series of control valves have been developed to meet the highest standards of process requirements in the industries of today and tomorrow.

A good service life, with quick and easy maintenance and no specialized tools required, coupled with our modular design and readily available spares, help you to reduce the cost of ownership.

## Features

- Clamp in place seat design enables quick and easy maintenance
- No special tools required
- Modular design of interior trim
- When used with Smart actuators, recalibration of the valve is automatic
- Now available with Metallic or Soft Seats
- Double sided PEEK seat extends service life by 2x

## Benefits to you

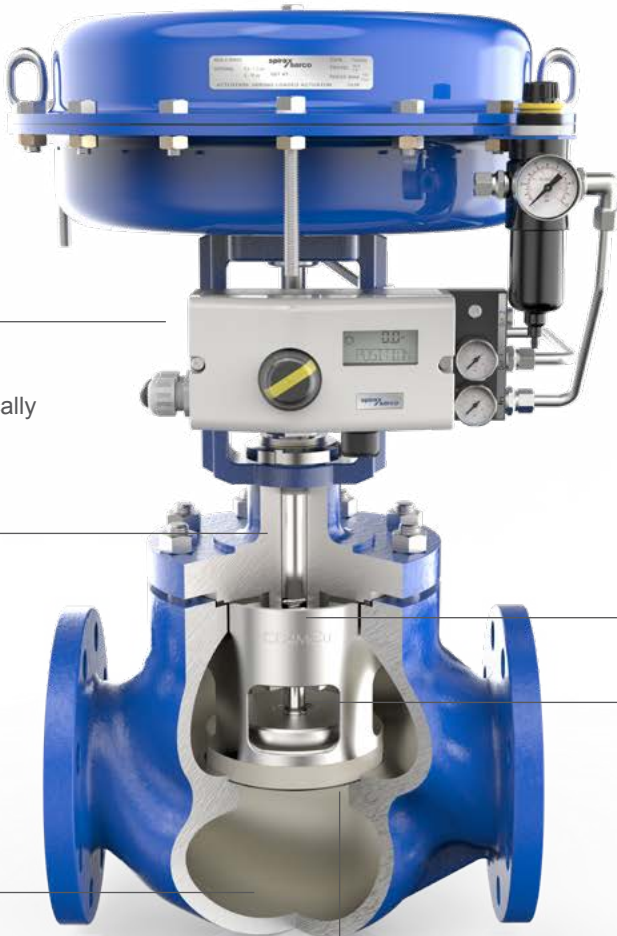

- Lower total cost of ownership
- Long service life due to resilient seating materials
- Quick commissioning function of the Smart actuators / positioners
- In-line maintenance
- Quick change modules and spare parts availability allow for adaptation after installation

# Spira-trol™ – Quick and Easy Optimization

**Supply air conditioning**  
Filters supply air to ISO 8573-1:2010 Class 3:3:3

**Plug / seat**  
Inner parts are easily replaceable

**Adjustable trim**  
**Reduced Cvs values**  
• Adjustment to the process for precise control

**Re-adjustment at the push of a button**

**Positioner**  
• Modern, smart technology  
• Re-adjustment occurs automatically

**Sealed from the inside out**

**Cone rod sealing**  
• Stem sealing with PTFE stacked chevrons  
• Reduction of emissions

**Optimized shape**

**Housing shape**  
• Long service life  
• Improved flow profiles

**Seat**  
**Sealing with PEEK**  
• Temperature to 482°F (250°C) with PEEK  
• Choose the best seating for your application  
• Also available in 431SS
