Pump/Trap Modules APT14 Series

Description

The compact low profile modular pump/trap system consists of the versatile APT 14 Automatic Pumping Trap pre-piped and mounted on a steel base.

The simplex or duplex modules include a condensate reservoir sized to accommodate the pump cycles.

The module requires only service field connections for complete installation and fast startup.

Typical applications

APT 14 pump/trap modules are used where low profile and high capacity condensate removal is required.

The APT 14 Pump Trap has the features of a conventional F&T trap combined with a pressured pump all in one unit.

- Air handlers
- Heat exchangers
- Absorption Chillers
- Evaporators
- Dryers

Standard Features

- Spirax Sarco non-electric APT 14 Automatic Pump Trap
- Simplex or Duplex units
- Motive steam drip station with Spirax Sarco UTD 52L trap and isolation valves and air vent.
- Hydrotested, blasted, and coated with SSI industrial enamel
- Fabricated by ASME Section IX certified welders.
- Completely assembled modular pumping system on platform steel base with all connections protected for shipping.

Additional Options are available

Suggested Specification

- Furnish and install where shown on plans, Spirax Sarco Inc. Model SPT4/DPT4-_____ Pressure powered pump/trap system.
- The system shall be a complete pre-piped factory package requiring only service connections for a fully functional system.
- Electricity shall not be required for system operation
- The receiver shall be constructed for 200 PSIG WP.
- The Pump/Trap shall be constructed of Ductile Iron with an allowable working pressure of no less than 200PSIG.
- The Pump/Trap shall be a unified system with stainless steel mechanism and no external glands or seals. Individual pump and trap systems will not be acceptable
- The package shall be sized to meet (or exceed) the actual required condensate system load.
- The package shall include a structural steel platform skid and painted with 1 coat enamel.

Typical Construction

Model	SPT4/DPT4
PMO	200 psig
Design Pressure (PMA)	232 psig @ 388°F
Capacity Range	Trap Mode- 850 to 10,021 lbs/hr Pump Mode-423 to 3075 lbs/hr
Receiver Vessel	Constructed for 200 psig @ 550°F
Hydrotest Pressure	230 psig
Construction Materials	Receiver vessel - Fabricated Steel APT 14 – See SSI Tech Sheets TI-5-228-US Valves - Carbon Steel Ball Valves Piping - A106 Seamless Carbon Steel
Dimensions & Weight	See SSI Sales Drawings

Capacity

For sizing data, see APT14 Selection & Capacity Chart TI-5-204-1-US.
