TI-P034-01-US Issue 2

Cast iron Float and Thermostatic Steam Traps FTB Super Capacity Series

Description

The trap contains a float valve mechanism which modulates to discharge condensate continuously at steam temperature. Non-condensible gases are released by a separate internal balanced pressure thermostatic air vent.

Model	FTB-20	FTB-30	FTB-125	FTB-175	FTB-200
РМО	20 psi g	30 psi g	125 psi g	175 psi g	200 psi g
Sizes	2"	2"	1-1/2"	2", 2-1/2"	1-1/2"
Connections	NPT				
Construction	Cast iron body				
Construction	Stainless steel internals				
Options	Gauge glass, vacuum breaker				

	FTB-20: 20 psi g	(1.4 bar g)
	FTB-30: 30 psi g	(2.1 bar g)
Maximum operating pressure (PMO)	FTB-125:125 psi g	(8.6 bar g)
	FTB-175:175 psi g	(12.1 bar g)
	FTB-200: 200 psi g	(14.0 bar g)
Maximum operating temperature	450 °F @ 200 psi g	(232 °C @ 14 bar g)

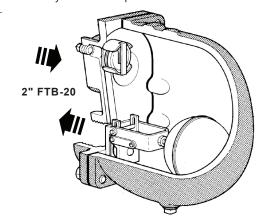

Pressure shell design conditions

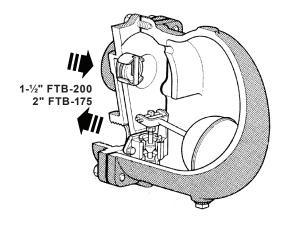

175 psi g/up to 450 °F	FTB-125			
(12.1 bar g/up to 232 °C)	FTB-175			
200 psi g/up to 450°F (14 bar g/up to 232°C)	FTB-200	PMA Maximum allowable temperature		
125 psi g/up to 450 °F	FTB-20			
(8.6 bar g/up to 232°C)	FTB-30			
	FTB-125			
450 ° F/0-175 psi g (232 °C/0-12.1 bar g)	FTB-175			
(FTB-20	Maximum allowable		
450 ° F/0-125 psi g (232 °C/0-8.6 bar g)	FTB-30	TMA temperature		
450 °F/0-200 psi g (232 °C/0-8.6 bar g)	FTB-200			

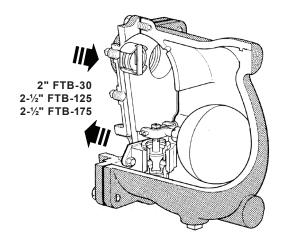

Typical applications

All process heat exchange equipment, particularly when controlled by modulating temperature control valves; unit heaters and air heating coils.

For capacities, see TI-2-317-US

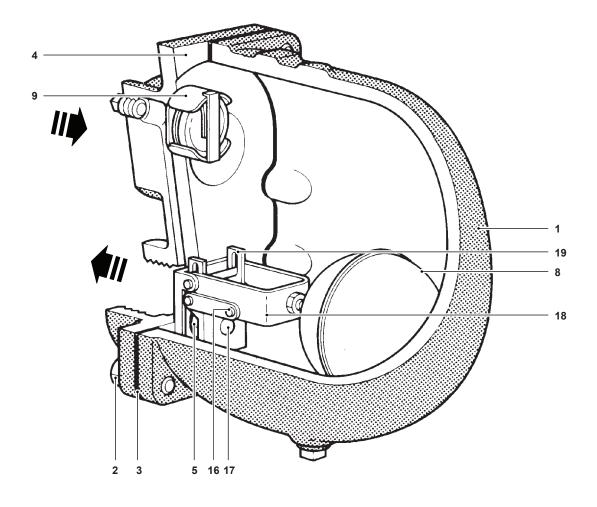

Materials

2" FTB-20

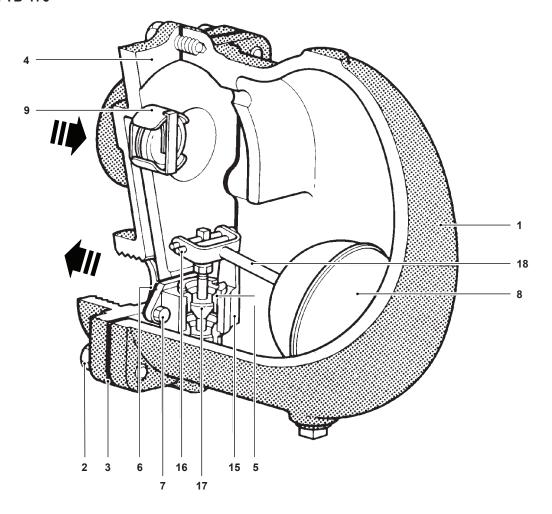

No.	Part	Material	
1	Body	Cast iron	ASTM A126 CL B
2	Cover screws	Carbon steel	ASTM A449 Type 1
3	Cover gasket	Graphite	
4	Cover	Cast iron	ASTM A126 CL B
5	Valve seat	Stainless steel	
8	Ball float	Stainless steel	

No.	Part	Material	
	Air vent assembly	Stainless steel	
9	Air vent head	Stainless steel	
	Air vent seat	Stainless steel	
16	Pivot pin	Stainless steel	
		Stainless steel	(FTB-20, 175, 200)
17	Valve head	Cast stainless steel	(FTB-30, 125, 200)
18	Float arm	Stainless steel	
19	Seat bracket, head bracket, stop, link	Stainless steel	(FTB-20)

Materials

1-½" FTB-200 2" FTB-175

1-½"	(231)	(58)	(14.1 kg)

Installation

A pipeline strainer should be installed ahead of any steam trap. Full-port isolating valves should be placed to permit servicing. The trap should be installed below the drainage point of the equipment with a collecting leg before the trap, in a position with the float arm in a horizontal plane so that the float rises and falls vertically, and with the direction of flow as indicated on the cover. Refer to IM-2-300-US for complete instructions.

Maintenance

This product can be maintained without disturbing the piping connections. Complete isolation from both supply and return line is required before any servicing is performed.

The trap should be disassembled periodically for inspection and cleaning of the valve head and seat, and operating mechanism. Worn or damaged parts should be replaced using a complete valve mechanism assembly and/or air vent assembly.

Complete installation and maintenance instructions are given in IM-2-300-US, which accompanies the product.

Sample specification

Steam traps shall be of the mechanical float type having Cast iron bodies, NPT connections, and Stainless steel valve heads and seats. Incorporated into the trap body shall be a Stainless steel balanced pressure thermostatic air vent capable of withstanding 450 °F and resisting waterhammer without sustaining damage. Internals of the trap shall be completely servicable without disturbing the piping.
