

## RIM20 Rotor Insertion Flowmeter

### Description

The RIM20 multivariable insertion turbine flowmeter utilizes **three primary sensing elements** to measure the mass flowrate of steam, liquids and gases:

- Turbine velocity sensor, - RTD temperature sensor, - Solid-state pressure transducer.

### Principle of operation

Insertion turbine flowmeters measure flow of liquid, gas, and steam by detecting the frequency of rotation of the turbine blades. According to the proven laws of physics, the frequency at which the turbine rotates is directly proportional to the flow velocity.

Insertion turbine flowmeters measure flow by detecting the local velocity at a strategically located position within the pipe. The RIM20 detects the frequency within the sensor head. It uses the local velocity, along with other parameters such as fluid type, pipe size, and Reynolds Number to calculate the average pipe velocity, and consequently, the volumetric flowrate.

### RIM20 range and benefits

The **RIM20-V** delivers a direct reading of volumetric flowrate, generally the most cost-effective solution for liquid flow monitoring, in applications ranging from general water flows to hydrocarbon fuel flow measurement.

The **RIM20-VT** integrates a precision 1000  $\Omega$  platinum RTD temperature sensor that can be used to calculate and output a compensated mass reading. This device is typically used to measure flowrates of saturated steam.

The **RIM20-VTP** offers you flow computer functionality in a compact field device. This multivariable instrument incorporates temperature and pressure sensors to provide an instantaneous reading of the compensated mass flowrate of gases, liquids and steam. In addition to outputs for totalized mass and alarm settings, the field-configurable electronics deliver up to three analogue 4-20 mA outputs of five process measurements, including volumetric flowrate, mass flowrate, pressure, temperature and density.

The **RIM20-EM** Energy Monitoring option permits real-time calculation of energy consumption for a facility or process. The flowmeter can be programmed to measure steam, hot water or chilled water. The RIM20-VTP flowmeter monitors one side of the process, either sent or returned, and uses the input from a second separate temperature sensor on the opposite leg of the process to calculate the change in energy. Selectable energy units include BTUs, joules, calories, Watt-hours, Megawatt-hours and Horsepower-hours. The local or remote electronics indicate two temperatures, delta T, mass total and energy total.

### Compliance

- Electromagnetic Compatibility Directive
- Low Voltage Directive

### Sizes

Insertion style mounting permits installation in any pipe DN50 (2") and greater.

## Technical data

<b>Wetted materials</b>	316L, 302, and 17-4PH, and 18-8 stainless steel, tungsten carbide, sapphire, plus: <ul style="list-style-type: none"> <li>• DuPont Teflon® based thread sealant on models with pressure transducer</li> <li>• DuPont Teflon® packing on standard temperature models with packing gland</li> <li>• Graphite based packing on high temperature models with packing gland</li> </ul>			
<b>Application</b>	Any gas, liquid or steam compatible with 316L stainless steel and other listed wetted materials. Not recommended for multi-phase fluids			
<b>Temperature</b>	<b>Process</b>	<b>S</b> option - <b>Standard</b> -55 °C to +232 °C (-67 °F to +450 °F)

## Sizing considerations

Piping conditions	<b>Straight run piping requirements</b>		<b>Upstream</b>	<b>Downstream</b>
	One 90° elbow before the flowmeter		10 D	5 D
	Two 90° elbows before the flowmeter		15 D	5 D
	Two 90° elbows out of plane before the flowmeter		30 D	5 D
	Reduction before the flowmeter		10 D	5 D
	Expansion before the flowmeter		20 D	5 D
	Partially open valve		30 D	5 D
	<b>D = Internal diameter of the pipe</b> - If there is not a sufficient straight run of pipe, a flow rectifier may be used to reduce the above diameter measurements. Consult your local Spirax Sarco representative or the factory for your specific application.			
Velocity range	Liquid	Maximum 9 metres/second (30 feet/second)		
		Minimum 0.15 metres/second (0.5 feet/second)		
	Gas or steam	Maximum 13 to 62 metres/second (43 to 205 feet/second) depending on rotor pitch		
		Minimum 1 to 3.7 metres/second (3.5 to 12 feet/second) depending on rotor pitch		

## Other installation considerations:

- **Mounting position**  
The RIM20 may be installed in vertical, horizontal, or angled pipe sections. The flowmeter is attached perpendicular to the axis of the pipe and should not be mounted 'upside-down' (with its top section hanging below the pipe mount). For liquid service, the fluid must completely fill the pipe.
- **Site selection**  
The flow measurement location should be selected to minimize turbulence and swirl. The extent of these flow disturbances depends upon the piping configuration. Valves, elbows, pumps, and other piping components may add disturbances to the flow.
- **Hot-tap compatibility**  
With the removable or permanent retractor assembly the RIM20 is 'hot-tappable' and can be installed and removed without shutting down the process. An isolation valve with a pipe mounting kit is used to isolate the flowmeter from the process.

## Accessories

### Removable retractor

For models without a permanent retractor, one removable retractor must be used if the process pressure is >3.4 bar g (50 psi g).

Removable retractor options	Removable retractor
	Extended length removable retractor – For use with extended length probes

**How to order example:** 1 off Spirax Sarco RIM20 - Removable retractor.

### Replacement rotors

Rotor spares	Rotor assembly, liquid, 40° pitch	L40
	Rotor assembly, steam/gas, 10° pitch	R10
	Rotor assembly, steam/gas, 15° pitch	R15
	Rotor assembly, steam/gas, 20° pitch	R20
	Rotor assembly, steam/gas, 25° pitch	R25
	Rotor assembly, steam/gas, 30° pitch	R30
	Rotor assembly, steam/gas, 40° pitch	R40

**How to order example:** 1 off Spirax Sarco RIM20 - L40 – Rotor Assembly.

## How to order

## Selection:

Category	Description	Suffix code	Grey = Standard		
<b>Flowmeter</b>	Insertion multivariable mass turbine flowmeter	<b>RIM20</b>	<b>RIM20</b>		
<b>Electronics</b>	Volumetric flowmeter for liquid, gas and steam	<b>V</b>	<b>V</b>		
	Velocity and temperature sensors	<b>VT</b>			
	Velocity, temperature and pressure sensors	<b>VTP</b>			
	Velocity, temperature and external 4 - 20 mA pressure input	<b>VTEP</b>			
	Velocity, external RTD temperature input, external 4 - 20 mA pressure input	<b>VETEP</b>			
	Energy output options	<b>VTEM</b>			
	Energy options with pressure sensor	<b>VTPEM</b>			
	Energy options, velocity, temperature and external 4 - 20 mA pressure input	<b>VTEPEM</b>			
<b>Probe length</b>	Standard length	<b>S</b>	<b>S</b>		
	Compact length - Only available for compression fitting connections CNPT, C150, C300, C600, C16, C40 and C63	<b>C</b>			
	Extended length	<b>E</b>			
<b>Electronics enclosure mounting</b>	Local mount NEMA 4X, IP66 Enclosure	<b>L</b>	<b>L</b>		
	Remote electronics NEMA 4X, IP66 25' cable with display - (not suitable for ATEX / IECEx)	<b>R25</b>			
	25' (7.6 m) armored cable with glands 'V' flowmeter only	<b>A25</b>			
	25' (7.6 m) armored cable with glands 'VT', 'VTP' flowmeter only	<b>A25P</b>			
	Remote electronics NEMA 4X, IP66 50' cable with display - (not suitable for ATEX / IECEx)	<b>R50</b>			
	50' (15.2 m) armored cable with glands 'V' flowmeter only	<b>A50</b>			
50' (15.2 m) armored cable with glands 'VT', 'VTP' flowmeter only	<b>A50P</b>				
<b>Display</b>	Digital display and programming buttons	<b>D</b>	<b>D</b>		
<b>Power supply</b>	12 - 36 Vdc, 25 mA, 1 W maximum required on loop powered flowmeters, 1HL only	<b>DL</b>	<b>DL</b>		
	12 - 36 Vdc, 300 mA, 9 W maximum - use with 1H, 1M, 1B, 3H, 3M, 3B	<b>DH</b>			
	100 - 240 Vac, 50/60 Hz line power, 5 W maximum - use with 1H, 1M, 1B, 3H, 3M, 3B	<b>AC</b>			
<b>Output signal</b> Inclusive of the scaled frequency output	Loop powered option - one analogue output (4 - 20 mA), one alarm, one pulse, HART®, DL input power only	<b>1HL</b>	<b>1HL</b>		
	One analogue output (4 - 20 mA), one alarm, one pulse, HART® communication protocol, DH or AC option only	<b>1H</b>			
	One analogue output (4 - 20 mA), one alarm, one pulse, MODBUS communication protocol, DH or AC option only	<b>1M</b>			
	One analogue output (4 - 20 mA), one alarm, one pulse, BACnet communication protocol, DH or AC option only	<b>1B</b>			
	Three analogue outputs (4 - 20 mA), three alarms, one pulse, HART® ('VT', 'VTP' only), DH or AC option only	<b>3H</b>			
	Three analogue outputs (4 - 20 mA), three alarms, one pulse, MODBUS ('VT', 'VTP' only), DH or AC option only	<b>3M</b>			
Three analogue outputs (4 - 20 mA), three alarms, one pulse, BACnet ('VT', 'VTP' only), DH or AC option only	<b>3B</b>				
<b>Process temperature</b>	Standard temperature Process temperature -55 °C to 232 °C -67 °F to 450 °F	<b>S</b>	<b>S</b>		
	High temperature Process temperature -267 °C to 454 °C -448 °F to 850 °F	<b>H</b>			
<b>Pressure sensor</b>	No pressure sensor	<b>P0</b>	<b>P0</b>		
	Maximum 2 bar a 30 psi a Proof 4 bar a 60 psi a	<b>P1</b>			
	Maximum 7 bar a 100 psi a Proof 14 bar a 200 psi a	<b>P2</b>			
	Maximum 20 bar a 300 psi a Proof 41 bar a 600 psi a	<b>P3</b>			
	Maximum 34 bar a 500 psi a Proof 69 bar a 1 000 psi a	<b>P4</b>			
	Maximum 100 bar a 1 500 psi a Proof 175 bar a 2 500 psi a	<b>P5</b>			
<b>Process connections</b>	Compression, 2" NPT	<b>CNPT</b>	Packing gland, 2" NPT, retractor (use with E probe)	<b>PNPTR-E</b>	<b>PNPTR</b>
	Compression, 2" ASME 150 flange	<b>C150</b>	Packing gland, 2" ASME 150 flange, retractor	<b>P150R</b>	
	Compression, DN50 PN16 flange	<b>C16</b>	Packing gland, 2" ASME 150 flange, retractor (E probe)	<b>P150R-E</b>	
	Compression, 2" ASME 300 flange	<b>C300</b>	Packing gland, DN50 PN16 flange, retractor	<b>P16R</b>	
	Compression, DN50 PN40 flange	<b>C40</b>	Packing gland, DN50 PN16 flange, retractor (E probe)	<b>P16R-E</b>	
	Compression, 2" ASME 600 flange	<b>C600</b>	Packing gland, 2" ASME 300 flange, retractor	<b>P300R</b>
