TI-P014-22-US EMM Issue 4

STAPS Wireless Head Unit for ISA100.11a applications

Description

The STAPS ISA100 wireless steam trap monitoring system has been designed to efficiently monitor and evaluate steam trap operation. It surveys the operation of the steam trap at regular intervals and identifies poor performance that can cause reduced plant efficiency and increased energy consumption. It can diagnose both failed-open steam traps that leak live steam, and those that have failed-closed or are blocked, resulting in waterlogging, leading to plant damage, product spoilage and health and safety concerns.

Using non-intrusive installation technology combined with an ISA100 wireless network makes it an ideal solution for steam trap monitoring.

It is suitable for use with all types of steam trap and can be connected to pipework up to 100 mm (4"), via an adjustable clamp.

Benefits include:

- Fully ISA100.11a compliant.
- Continuous monitoring of all steam traps.
- Reduces energy and emissions loss significantly.
- Immediate identification of failure location for quick response/action.
- Non-intrusive no need to break into the steam line to install.
- A range of clamps to suit pipework ranging up to 100 mm (4").
- No need for height access equipment to check trap operation.
- Typically 3 years battery life.
- Security assured wireless network certified to ISA100.11a.
- Intrinsically safe for hazardous zones

Certification and Approvals

Radio:

Complies to EN 300 328 V2.1.1 FCC CFR 47 part 15.247

EMC Emissions and immunity:

EN 61326 -1: 2013

EN 61326-2-1: 2013

EN 61326-2-3: 2013

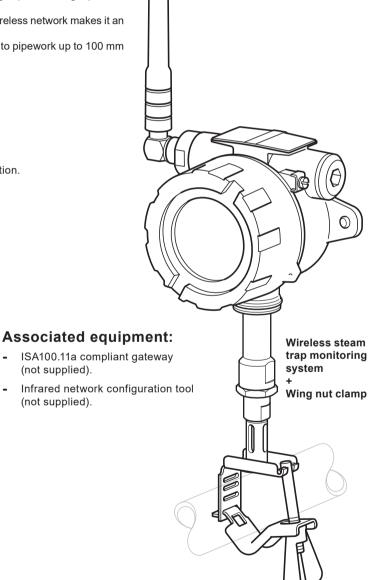

Safety

Complies with IEC / EN 61010 1 2010 (third edition) CSA 22.2.

Hazard area approvals:

IECEx certification and ATEX intrinsic safety certification.

IECEx certificate : IECEx SIR 15.0070X
 ATEX certificate : Sira 15ATEX2197X

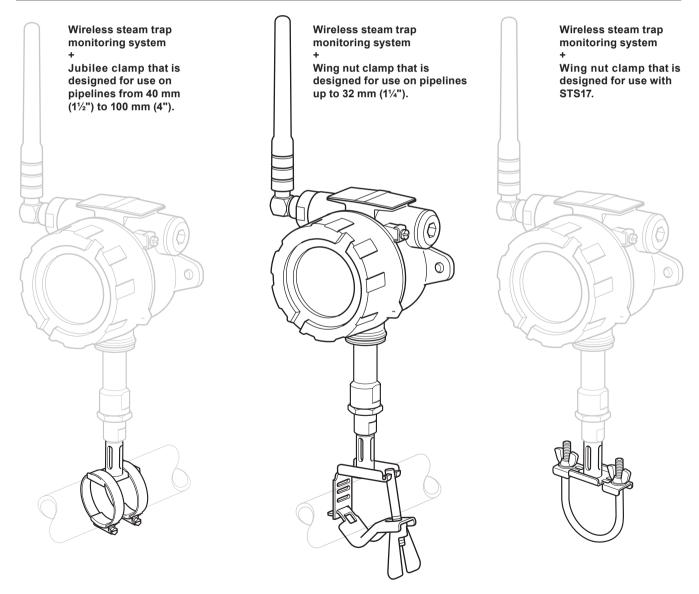

Sizes and pipe connectionsThe STAPS wireless monitoring system is suitable for connecting to pipework up to 100 mm (4"), via an adjustable clamp.

Options

- +4 dBi Antenna with 3 m (10 ft) RF cable. Contact Spirax Sarco for model reference.
- Heat Shield Kit

Materials

	Head casing	Epoxy coated copper free aluminium (less than 0.4% copper)						
	Sensor housing	Stainless steel 316						
	Sensor	PZT						
	Clamp	Stainless steel 316						
Head unit	Winged nut	Stainless steel 316						
	Probe	Stainless steel						
	Antenna	Stainless steel 316						
	Antenna casing	ABS						
	'O' ring	Oil proof TPE rubber						

Technical information

Head unit:

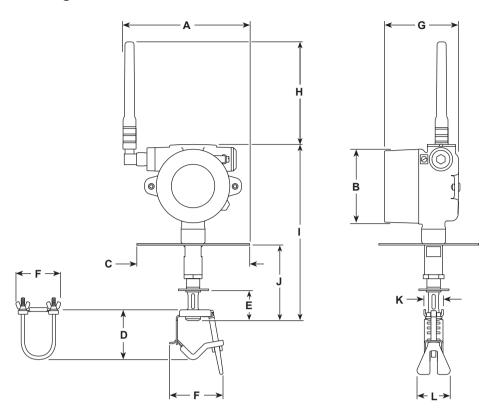

Available with remote +4 dBi antenna.

Integral battery	Lithium Thionyl Chloride									
Maximum altitude	3 000 m									
Ambient temperature range	-20 to +70°C (-4 to +158°F)									
Maximum pipe temperature	427°C (800°F)	427°C (800°F)								
Maximum relative humidity	95%									
Enclosure ingress rating	IP66 / NEMA4X									
	Protocol ISA100 11a									
	Data rate	250 kbps								
	Frequency	2400 – 2483.5 MHz free ISM band								
Output	Radio security	ity AES 128 bit codified								
	Output power	power 10 dBm (fixed)								
	Antenna	nopole type (4dBi option). Maximum output transmitting								
	Process pipe surface temperature									
10.4400.445 amala a imputa	Sensor temperature									
ISA100.11a analog inputs	Trap condition (good, leak, cold)									
	Steam loss									
	Trap type									
	Polling rate									
Configuration	Orifice diameter									
	Pressure									
	Return line type									
	Battery status									
Diagnostics	Signal strength									
	DIAG_STATUS									
		Equipment protection level	IECEx certificate : IECEx SIR 15.0070X							
		Gas	Ex ia op is IIC T4 Ga							
		Dust	Ex ia IIIC op is T135°C Da							
Certification	IECEx	Tamb	-20 to +70°C (-4 to +158°F)							
The certification and		Tprocess	-20 to +427°C (-4 to +800°F)							
approvals are only valid if the product is installed		For use with Tadiran SL 2880 3.6 V Lithium Thionyl Chloride Battery only.								
using the genuine supplied		Standards used	IEC 60079-0, IEC 60079-11 and IEC 60079-28							
component parts and accessories, including		ATEX intrinsic safety ⟨₺⟩	ATEX certificate : Sira 15ATEX2197X							
consumable items such as		Gas	Ex ia op is IIC T4 Ga							
batteries and power leads.		Dust	Ex ia IIIC op is T135°C Da							
	European	Tamb -20 to +70°C (-4 to +158°F)								
	•									
	·	Tprocess	-20 to +427°C (-4 to +800°F)							
	·	'	-20 to +427°C (-4 to +800°F) 0 3.6 V Lithium Thionyl Chloride Battery only.							

How does the STAPS ISA100 wireless steam trap monitoring system work?

A head unit assembly mounted on the pipe upstream of the trap to be monitored 'listens' to the sound signature of the trap in operation. This sound signature is categorized and a steam loss value is calculated and transmitted via an ISA100, 2.4 GHz wireless network to an ISA100 wireless compliant gateway (Not Supplied).

Each STAPS head unit is powered by a long life Lithium battery (typical battery life of over 3 years).

Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-P014-23) supplied with the product.

Disposal:

- The Lithium Thionyl Chloride battery must be disposed of in line with local legislation. It must be remembered that battery hazards remain even when the cells are discharged.
- The Piezo sensor should be disposed of in line with local lead disposal guidelines.

No other ecological hazard is anticipated with the disposal of this product. It should be disposed of within the local recycling procedures.

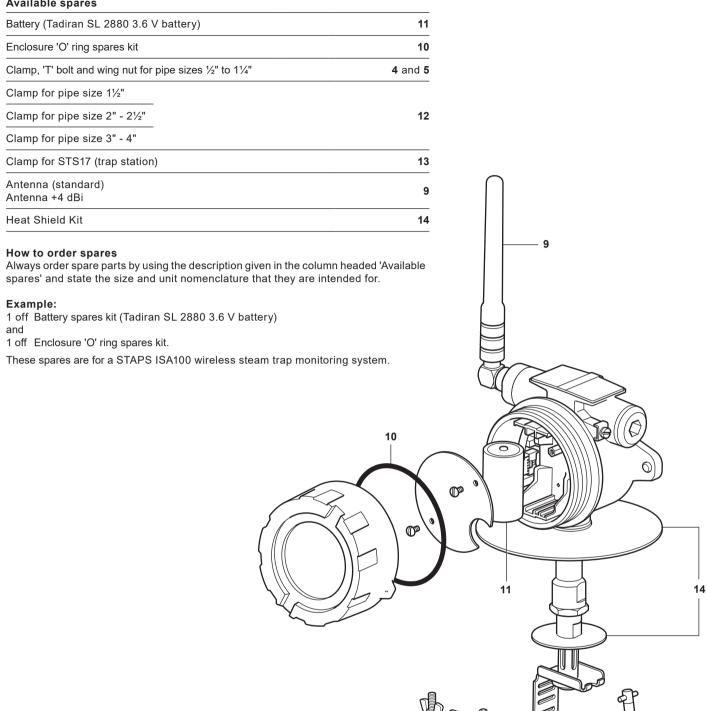

How to order

Contact your local Spirax Sarco representative to arrange a site survey and installations.

Spare parts

Only the parts listed below are available for the STAPS ISA100 wireless steam trap monitoring system. No other parts are supplied as spares.
